## From the Publisher

n the pre-liberalized regime, intermediation in insurance was synonymous with the agent; and • whatever was required to be done in the area of insurance marketing or servicing, it used to devolve upon the agent. The agency channel thus has developed deep and strong roots in the Indian insurance industry. The need for spreading the message of insurance in the remote parts of the country was greatly fulfilled by the agent; and thus the insurance agent came to be recognised as the indispensable link between the rural masses and the insurers who remained largely limited to urban centres. Although the basic tenets of poverty alleviation programmes introduced in the seventies and eighties emphasized the need for taking financial services to the door-step of the downtrodden, it would still be ambitious to have expected the insurance business to be on par with banking. All the same, the public sector insurers still contributed a great deal in widening the business network to as remote corners as possible; and the agent played a key role in accomplishing this task.

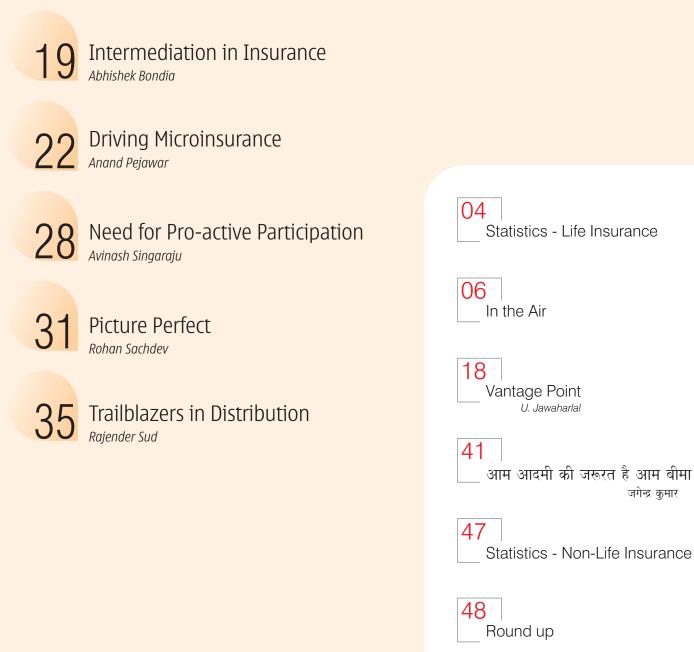

The priorities of insurers in the face of privatization were, however, different and a need arose for reaching the maximum number of people – the accessibility of their dwelling notwithstanding. While opening offices in the more inaccessible areas would without doubt be unviable, it has come to be accepted that no one should be denied the benefits of insurance merely for the reasons of inaccessibility. Banks, especially the public sector banks, have spread their tentacles all over the country and banking has come to be within the easy reach of the vast majority. The network and reach of these banks has thus begun to be accepted as a good source of widening the insurance network. Bancassurance in this respect has a huge role to play in not only identifying the targets of various classes of insurance but also in extending various services to the needy.

Similarly, in the domain of corporate clientele, the role for the insurers ends not merely with offering insurance products to the customers. Taking a holistic view of all the perils that a corporate entity confronts, identify the plausible solutions and design a wholesome risk management package is the need of the industry presently. In order to achieve this, there is a serious need for a highly literate broker that is totally conversant with the emerging risks and the suggested solutions. The brokers' channel delivers a great deal of value in more developed markets; and it is hoped that it is not long before it is emulated in the Indian insurance domain.

'Importance of Insurance Distribution' is the focus of this issue of the Journal. In order that insurance receives its due importance, it is essential that the entire range of services to the policyholder is rendered efficiently. 'Policyholder Services' will be the focus of the next issue of the Journal.

# Going Great Guns - Efficiency in Distribution

s a nation, we have been obsessed with improving our literacy levels. It gives us great pleasure that the country has registered a considerable growth over a certain period of time, notwithstanding the fact that genuine, core literacy has not made much progress. The percentage growth observed only indicates that there has been an increase in the number of people who can write their own names, or any other parameter equivalent of that. While it serves the purpose of keeping a track of the illiterate masses leaning towards acquiring literacy skills, it does not really add up to a genuine growth of education in the society.

If that is the trend noticed in acquisition of general levels of education, it is much less in the domain of financial services. It is unfortunate, in a way, that a large section of the highly literate intellectuals also evince a serious lack of interest in the domain of financial services thereby necessitating a certain and important role for intermediation. Thanks to the essentiality of banking services as also the proactive role adopted by the regulator for the last several decades, we can boast of a reasonably high level of awareness in the banking services which is not matched by that of the other financial services much less in insurance. Intermediation in insurance has thus acquired a great importance to ensure that the insured

population as also the insured assets come close to a level matching with those of the other comparable economies.

Further, it also puts a great onus on the intermediaries to ensure that they play their role to assist the service seeker in identifying and acquiring solutions that genuinely serve his/her interests. If one looks at the large number of contract withdrawals and the complaints associated with being sold the wrong product, one doubts whether such a totally customer oriented service is being accomplished. Irrespective of the segment to which we cater, as also the distribution channel through which we are serving; such indiscretions should be arrested at the earliest opportunity in order that we march ahead with gusto and positive energy.

'Intermediation in Insurance' is the focus of this issue of the **Journal** once again. We have earlier commented that a debate on which is the best channel would eventually lead us nowhere; and as an endorsement of the statement, we have articles narrating the importance of different channels of distribution. We open the debate with an article by Mr.Abhishek Bondia, a practitioner himself, which talks about the huge advantages the insurance industry acquires through the Brokers channel. In the next article, Mr. Anand Pejawar discusses the huge impact made by the Bancassurance channel in the Indian insurance domain and what can be foreseen in the not-too-distant future in a country where a huge chunk of the population is still essentially rural. There is always a scope for improvement in operational efficiency; and this fact is laid threadbare by Mr. Avinash Singaraju in his article on the methods being followed in Bancassurance.

'The Bancassurance channel has made a huge difference to insurance business in various European countries and there is no reason why the Indian insurance industry cannot emulate such a performance' argues Mr. Rohan Sachdev in the next article. The one word that is often associated with the agency channel, especially in the Indian insurance business, is 'ubiquitous' and why not? Mr. Rajender Sud has lots of reasons to justify the role that is played so diligently by the Agent in furthering the cause of life insurance promotion in its true sense.

In order that any industry makes steady progress, it is very essential that the services rendered to the customer are wholesome and trustworthy. 'Policyholder Services in Insurance' will be the focus of the next issue of the **Journal**.

-/Sd (J. Hari Narayan) Chairman

Date: 23.12.2011

# Order

#### IRDA/NL/ORD/MPL/277/12/2011

#### Order of Insurance Regulatory and Development Authority on Reforming the Indian Motor Third Party Pool

In exercise of the powers vested under Section 14 (2) of the IRDA Act, 1999, the Authority issues the following order reforming the Indian Motor Third Party Pool System. The Authority hereby creates a declined risk pool for Act only Commercial Vehicle Third Party Insurance with effect from 1.4.2012.

#### Preamble

The Authority has constituted Indian Motor Third Party Pool in the year 2007 by

its order dated 03S/IRDA/Motor-TP/Dec-06 dated 4th December, 2006 with an objective of ensuring free availability of third party motor liability policies of the commercial vehicle owners. During the year 2010-11, the Authority has reviewed the performance of the pool through a

series of studies on the management, the financial aspects and the valuation of the liabilities of the pool by the pool administrator and the member companies. The Authority constituted Technical Committee on Commercial third Party Liability Cover vide its order no IRDA/ NL/ORD/IMPL/12/2010 dated 17th December. 2010 to review the current arrangement of motor third party liability pool, to examine the possibility and modalities to, be adopted for creating declined pool of commercial vehicles to ensure the availability of third party liability cover to all commercial vehicles, to examine the possibility to provide third party liability cover to the driver in addition to the vehicles. Further three sub- committees were formed to go into each of issues. The sub-committee headed by Mr K.P Sarma, Consultant Actuary submitted the report which highlighted clear under-reserving and data inadequacies.

In view of the alarming increase in the liabilities of the pool, inadequate provisioning by the member companies and due to the inefficient management of the pool by the administrator, "the Authority appointed Government Actuary's Department from UK to candent the peer review of the report of the appointed actuary of the Pool. The review report states that given the significant data issues a precise estimate of the pool liability entails great uncertainty and also corresponding impact on the selection of loss development factors.

The Authority met the CMD's of the Public Sector Companies and made a presentation on the results of the motor third party pool on 9th December, 2011. The Authority followed this with communication dated 5th December, 2011 to the Secretary General, General Insurance Council seeking their views on the proposed declined risk pool. Simultaneously the Authority also addressed a communication dated December, 5th December, 2011, to the Transporters Association seeking their views an the proposed declined risk commercial vehicle pool. The Chairman, IRDA met the CEO's of the general insurance companies on 15th December, 2011 to discuss the concerns of the general insurers an the proposed mechanism. Arising out of this meeting the Chairman. IRDA constituted a committee vide its order no. IRDA/Admn/ ORD/MISC/273/12/2011 dated 15th December, 2011 to evolve consensus on the operational mechanism. The committee met on 21st December, 2011 and submitted its report to the Authority on 21st December, 2011.

Thus the independent review conducted by the Authority through various agencies has revealed that the current framework of the pool is severely affecting the financial viability of the general insurance sector due to alarming capital depletion in the sector. The analysis of the data also revealed huge inefficiencies in claim settlement by the companies reflected in the average claim ratio. Which differed by as much as 100%. This has a direct bearing an the policyholders interest as inefficient management will result in higher premium for commercial vehicle owners. The Authority after having examined the current framework of the pool and its financial management is satisfied that the pool in its farm is eroding the interests of the policyholders and is also causing financial distress to the general insurance companies. In order to ensure that the sector grows in a healthy fashion and the policyholders interest is protected, the Authority makes the fallowing order setting up a declined risks pool for third party commercial vehicle motor insurance with effect from 1.4.2012.

Framework for Indian Motor Third Party Declined Risk Insurance pool for Commercial vehicles (Act only Insurance)

#### 1 Purpose

The purpose of creating the Indian Motor Third Party Declined Risk Insurance Pool for Commercial vehicles (Act only Insurances) is as follows:

# Re: Asset-liability management and Stress testing

#### Part 1- Asset Liability Management

1. Asset-liability management (ALM) is the practice of managing a business so that decisions and actions taken with respect to assets and liabilities are coordinated. ALM is relevant to, and critical for, the sound management of the finances of the insurers that invests to meet its future cash flow needs and capital requirements.

2. As Asset Liability Management plays a

vital role in the sound management of the insurance business, the Authority has mandated all the life insurers to provide the details of Asset Liability Management activities undertaken by them in Chapter-5. Risk Management of Appointed Actuary's Annual Report. The framework of ALM has also been discussed in the Corporate Guidelines.

3. On thorough examination of the details of ALM activities submitted by the life insurers in the AAAR for the year ended March 31, 2010, it appeared that these details are incomplete and inconsistent. As the mandate by the Authority was very broad, each insurer had adopted their own measures in reporting such details in AAAR.

4. To bring consistency in ALM reporting and to strengthen the ALM framework, the following additional guidelines to the existing framework are prescribed. The guidelines shall be applicable to all life insurers and shall come into effect from 1st April 2012.

 Insurers shall have an ALM policy approved by the Board of the insurer and shall be submitted to the Authority within
 90 days from the date of this circular. The Board shall approve the. insurer's ALM policy, considering the asset-liability relationships, the insurer's overall risk tolerance, risk and return requirements, solvency position and liquidity requirements. The Board shall regularly review such 'policy at the year end or at

6. Insurers shall have in place effective procedures for monitoring and managing their asset-liability positions to ensure that their investment activities and asset positions are appropriate to their liability, risk profiles and their solvency positions. The insurers shall confirm compliance to this requirement within 90 days from the date of this circular.

7. The ALM policy should, at the minimum, enable the insurer to:

- a. understand the risks they are exposed to;.
- b. develop ALM policies to manage them effectively;
- c. apply techniques appropriate for the nature of their business, the risks they undertake and specific local market conditions; and
- d. measure the interest rate risk, in particular, faced by the insurers and thereby improving the assessment of the asset liability management strategies of the

#### insurers.

8. The insurer shall examine all risks requiring the coordination of its assets and liabilities. The ALM framework shall cover all the areas significant in terms of their potential impact on economic value. The economic value of asset or liability cash flows, derived in such a way as to be consistent with current market prices where they are available, or using marketconsistent principles, methodologies or parameters. These may include risks like:

- a) Market Risk
- i) interest rate risk (Including variations in market credit spreads)
- Ii) equity, real estate arid other asset value risks
- iii) currency risk
- iv) related credit risk
- b) Underwriting Risk
- c) Liquidity Risk

9. The insurer shall develop and Implement controls and reporting procedures for its ALM policies that are appropriate for its business and the risks to which it is exposed. These shall be monitored closely and reviewed regularly.

10. All life insurers shall submit the data with respect to the assets and liabilities in the format. (Table-ALM-Quarterly) as per Annexure-1, on a quarterly basis within 45days from the end of each quarter, starting from the quarter ending March 2012 (as already we are in December) onwards and Table-ALM-Yearly on yearly basis along with AAAR.

11. 'Table-AlM-Quarterly' data shall be furnished for:

• base discount rate (as per yield curve available on the date of annual valuation) applicable and, with such base discount rate increased & decreased by 1 % and 2%.

Further to the above table, the 'Tabie-AlM-Yearly' shall also contain the details about the Impact on duration due to changes in the following:

- a) fall of 30% in Equity values, 100 basis points fall in yield available on various fixed interest securities, adverse d e v i a t i o n o f 10% i n mortality/morbidity, expenses, withdrawal/lapse rates and 25% (increase and decreasing) in new business volumes independently.
- b) fall of 30% p.a. in Equity values, 100 basis points p.a. fall in yield available on various fixed interest securities, annual adverse deviation of 10% p.a. in mortality/morbidity, expenses, withdrawal/lapse rates and 25% (increase and decreasing) in new business, during three years from the report date independently.

12. 'Table-ALM' data shall be furnished separately for 'Life, 'Pension', 'General Annuity' and 'Health' businesses. If mathematical reserves of any line of business as per latest annual valuation results is less than 5% of the mathematical reserves of the total business, such line of business need not be considered for ALM framework. Under all the classes of businesses non-linked and linked (non-unit part) business shall be furnished separately.

#### Part II- Stress testing

13. Stress testing helps insurers to ascertain the potential level of vulnerability to different scenarios, to manage their risks and maintain enough financial resources to manage them. Stress tests enable insurers to study the quantitative impact of different scenarios and its affect on the solvency of an insurer. The stresses may be financial, operational, legal, liquidity based or be related to any other risk that might have an adverse economic impact on the insurer.

14. Stress Testing being critical in the management of risks and the financial

soundness of the insurers, Authority vide Circular No: IRDAIACTIICIRIGEN/ 045/03/2011, March 7, 2011, mandated all the life Insurers to conduct scenario and sensitivity testing as part of the Actuarial Report and Abstract (from the year ended March 31, 2011).

15. On thorough examination of the requirements, it has been felt necessary to prescribe minimum requirements for the stress testing. In this regard, the Insurer shall submit Annexure-ST (as prescribed in the said circular) as per the risk factors described in Annexure-2. The amount of deviation in the risk factors may be considered as per the risk profile of the insurer. However, the insurer shall submit the results of stress testing. with respect to the scenarios based on the following specific risk factors as stated below in addition to the insurer specific risk factors.

- Fall of 30% in Equity values, 100 basis points fall in yield available on various fixed interest securities, adverse deviation of 10% in mortality/ morbidity, expenses, withdrawal/lapse rates and 25% (increase and decrease) in new business volumes independently.
- ii. Fall of 30% p.a. in Equity values, 1.0.0 basis points p.a. fall in yield available on various fixed interest securities Annual adverse deviation of 10% p.a. in mortality/morbidity, expenses, withdrawal/lapse rates and 25% (increase and decrease) in new business, during three years from the report date independently.

16. Insurer's Board shall ensure timely review of the issues emanating from 'Table-ALM' data and Annexure-ST and take such corrective action as may be necessary under intimation to the Authority. 17. The Appointed Actuaries may follow Actuarial Practice Standards issued by Institute of Actuaries of India in this regard if any.

The circular is issued under Section 14 of IRDA Act, 1999.

#### Annexure-1

The amount of assets and liabilities in each of the duration buckets as indicated below should be furnished. Macaulay duration should be used in this regard. Class of business:

Unit Linked/Non-Linked Business:

# Annexure-2

List of 'Risk Factors' to be considered in projecting financial and capital adequacy positions over the one-year period immediately following recent March 31.

1. Mortality/Morbidity: adverse deviation in experience

7 Invæctment return

2. Investment returns

(a) Yield curve

(i) Parallel yield curve shift

(ii) No change for duration less than 5 years, parallel shift for duration more than 5 years, linear interpolation.

(iii) Parallel shift for duration less than5 years, no change for durationmore than 5 years, linear

interpolation

(iv) Change in credit spreads

(b) Equity market

(i) Equity crash - fall in all market by market

(ii) Stock specific event risk - move in each individual stock, by stock

3. Expenses: increase in expenses

4. Termination rates: adverse deviation in experience

5. New business: fall in new business

6. The appointed actuary shall also include shock scenarios to company's experience in the next projection year arising from changes in:

(a) reinsurance ceded;

(b) reserving basis;

(c) exercise rate of policy options;

(d) distribution to shareholders; and

(e) taxation.

7. The appointed actuary may also consider any other factors that have significant relevance to the insurer's business.

List of 'Risk Factors' to be considered in projecting financial and capital adequacy positions over the three-year period immediately following recent March 31.

 Mortality/Morbidity: yearly deterioration in experience over the projection period

2. Investment returns

(a) Yield curve:

(i) Parallel yearly yield curve shift

 (ii) No change for duration less than 5 years, yearly parallel shift for

duration more than 5 years, linear interpolation

(iii) Yearly parallel shift for duration less than 5 years, no change for duration more than 5 years, linear interpolation

(iv) Change in credit spreads

(b) Equity market

- (i) Equity dividend yield fall over the projection period
- (ii) Equity total returns deteriorateover the projection period

3. Expenses: Yearly deterioration in experience over the projection period

4. Termination rates: Yearly deterioration in experience over the projection period

 New business: Yearly fall in new business income over the projection period

6. Where material, the appointed actuary shall also include scenarios on deterioration of company's experience over the projection period arising from changesin:

(a) bonus scales;

(b) reinsurance ceded;

(c) reserving basis;

(d) exercise rate of policy options;

(e) distribution to shareholders; and

(f) taxation;

7. The appointed actuary may also consider any other factors that have significant relevance to the insurer's business.

### CEOs of all Non-life Insurers and Reinsures 03.01.2012

IRDA/ACTL/CIR/ALM/006/01/2012

#### То

#### CEOs of all Non-life Insurers and Reinsures

#### Re: Asset-Liability management and Stress testing

#### Part-I Asset Liability Management

1. Asset-liability management (ALM) is the practice of managing a business so that decisions and actions taken with respect to assets and liabilities are coordinated. ALM is relevant to, and critical for, the sound management of the finances of the insurers that invests to meet its future cash flow needs and capital requirements.

2. As Asset Liability Management plays a vital role in the sound management of the insurance business, Authority vide its Circular No: IRDAIACT/CIRIMISC/081/ 0512010, May 13, 2010, has mandated all the non-life insurers to provide the details of ALM activities undertaken by them Section-11 on 'Investments and ALM' of Financial Condition Report (FCR) and also discussed the framework of ALM in its guidelines on Corporate Governance. On thorough examination of the details of ALM activities submitted by the non-life insurers in the FCR for the year ended March 31, 2010, it appeared that these details are incomplete and inconsistent. As the mandate by the Authority was very broad, each insurer had adopted their own measures in reporting such details in FCR. In this regard, the following framework shall be put in place by the insurers.

The guidelines shall be applicable to all non-life insurers and reinsurers and shall come into effect from1st April 2012.

#### I. Asset Liability Management:

3. Insurers shall have an ALM policy approved by the Board of the insurer and shall be submitted to the Authority within 90 days from the date of this circular. The Board shall approve the Insurer's ALM policy, considering the asset-liability relationships, the insurer's overall risk tolerance, risk and return requirements, solvency position and liquidity requirements. The Board shall regularly review such policy at the year¬ end or at more frequently, if required and submit to the Authority any changes in the ALM policy along with the FCR.

4. Insurers shall have in place effective procedures for monitoring and managing their asset-liability positions to ensure that their investment activities and asset positions are appropriate to their liability, risk profiles and their solvency positions. The insurers shall confirm compliance to this requirement within 90 days from the date of this circular.

5. The ALM policy shall, at the minimum, enable the insurer to:

- a. understand the risks they are exposed to:
- b. develop, ALM policies to manage them effectively;
- c. apply techniques appropriate for the nature of their business, the risks they undertake and specific/local market conditions: and
- d. measure the interest rate risk, in particular, faced by the insurers and thereby improving the assessment of

the asset liability management strategies of the insurers.

6. The insurer shall examine all risks requiring the coordination of its assets and liabilities. The ALM framework shall cover all the areas significant in terms of their potential impact on economic value. The economic value of asset or liability cash flows, derived in such a way as to be consistent with current market rices where they are available, or using marketconsistent principles; methodologies or parameters. These may include risks like:

#### i. Market Risk

- a. interest rate risk (including variations in market credit spreads)
- b. equity, real estate and other assetvalue risks
- c. currency risk
- d. related credit risk
- ii. Underwriting Risk
- iii. Liquidity risk

7. The insurer shall develop and implement controls and reporting procedures for its ALM policies that are appropriate for its business and the risks to which it is exposed. These shall be monitored closely and reviewed regularly.

8. All non-life insurers shall submit the data with respect to, the assets and liabilities in the format, Table-ALM-Quarterly as per Annexure-1, on a quarterly basis within 45 days from the end of each quarter, starting from the quarter ending March 2012 onwards.

3. 'Table-ALM' data shall be signed by, Chief Executive Officer, Chief Financial Officer and Appointed Actuary,

#### Annexure-3

List of 'Risk Factors' to be considered in projecting financial and capital adequacy positions over the one-year period Immediately following .recent March 31.

1. Mortality/Morbidity/Claim rates: adverse deviation in experience

2. Investment returns

(a) Yield curve

(i) Parallel yield curve shift

(ii) No change for duration less than 5 years, parallel shift for duration more than 5 years, linear interpolation

(iii) Parallel shift for duration less than 5 years, no change for duration more than 5 years, linear interpolation

(iv) Change in credit spreads

(b) Equity market

(i) Equity crash - fall in all market, by market

(ii) Stock specific event risk - move in each individual stock, by stock

3. Expenses: increase in expenses

4. Renewal rates: adverse deviation in experience

5. New business: fall in new business

6. The appointed actuary shall also include shock scenarios to company's experience in the next projection year arising from changes in:

(a) reinsurance ceded;

(b) reserving basis;

(c) exercise rate of policy options;

(d) distribution to shareholders; and

(e) taxation.

7. The appointed actuary may also consider any other factors that have significant relevance to the insurer's business.

List of 'Risk Factors' to be considered in projecting financial and capital adequacy positions over the three year period immediately following recent March 31.

1. Mortality/Morbidity/Claim rates: yearly deterioration in experience over the projection period

2. Investment returns

(a) Yield curve:

(i) Parallel yearly yield curve shift

(ii) No change for duration less than 5 years, yearly parallel shift for duration more than 5 years, linear interpolation

(iii) Yearly parallel shift for duration less than 5 years, no change for duration more than 5 years, linear interpolation(iv) Change in credit spreads

(b) Equity market

(i) Equity dividend yield fall over the projection period

(ii) Equity total returns deteriorate over the projection period

3. Expenses: Yearly deterioration in experience over the projection

4. Renewal rates: Yearly deterioration in experience over the projection period

5. New business: Yearly fall in new business income over the projection period

6. Where material, the appointed actuary shall also include scenarios on deterioration of company's experience over the projection period arising from changes in:

(a) reinsurance ceded:

(b) reserving basis;

(c) exercise rate of policy options;

(d) distribution to shareholders; and

(e) taxation;

7. The appointed actuary may also consider any other factors that have significant relevance to the insurer's business.

-/Sd (J. Hari Narayan) Chairman

# 14<sup>th</sup> Global Conference of Actuaries

The 14<sup>th</sup> Global Conference of Actuaries (GCA) is being held jointly by the Institute of Actuaries of India (IAI) and International Actuarial Association (IAA) between 19th and 21st February, 2012 at Mumbai. The focus of the conference would be "Meeting the Challenges of Change".

This year's conference would cover a whole gamut of topics which would be discussed and debated by eminent global personalities from the world of insurance, education and consulting. The inaugural Keynote Address on 20th February would be delivered by Mr. J. Hari Narayan, Chairman, IRDA.

The conference would provide an effective platform for discussing the emerging global scenario and the role of the actuarial profession.

**Venue:** Renaissance Mumbai Convention Centre, Mumbai.

# Are You Being Served?

'When a service is expected to be delivered, the provider should consider the rationale behind the need for such a service. Mere fulfilment of a process does not help the cause and would eventually lead to the detriment of the service provider in the long run' comments U. Jawaharlal.

'n the modern times, the way a service is rendered to a client has come to be L seen as a more important factor than the efficacy of the product itself. With the emphasis that the global players are putting on delivering the best services to their clientele across all sectors, there is a certain percolation of the effect – among all the countries as also among all the domains. The net result, accordingly, is that we have had the occasion to witness a tremendous growth in what is termed collectively as 'customer service'. Rendering the service in true spirit and not merely going about the formality religiously is the crux of the matter. The regulators and supervisors world over have also added their bit to the initiative by defining various aspects associated with rendering efficient customer service.

There have been several attempts in even quantifying the ability of a service provider in rendering various services. 'Turn Around Time' (TATs) in the domain of

financial services is an example of such guantification, although it was originally meant to be a measuring factor for the efficacy of a computer programme. The fact that it has provided various supervisors the ease of assessing the quality of services rendered by an organization speaks volumes about its usefulness. In India, banks were the first to adopt the standards in the domain of financial services; and somewhere along the line, the other financial service operators have emulated the example set by them. If not anything else, the initiative is bound to inculcate some discipline into the working methods of organizations; and to that extent it certainly increases their efficiency.

In the domain of insurance, there is no limit to the types of services that can be rendered to the policyholders – especially in light of the long-term nature of life insurance business and the renewability associated with the non-life insurance

contracts. However, there may be occasions when the policyholder is not even aware of the various formalities associated with fulfilling some of these functions. It is in this regard that the proactive stance to be adopted by the insurers in delivering the services to the policyholder would define the level of efficiency. Further, it would also be a matter of great success for the insurers if they ensure that the distributor associated with each of the contracts enlightens the policyholder about his or her rights and obligations. Training the distributors exhaustively with regard to the services to be rendered to the policyholders should take the priority in the managerial functions.

'Policyholders' Services in Insurance' will be the focus of the next issue of the Journal. Let us look forward to an interesting collection of articles.

in the next issue...

# Intermediation in Insurance - The Role of a Broker

Abhishek Bondia suggests that in view of the several advantages that the Brokers' channel brings to the industry, there should be better ways of incentivizing it - in pursuit of overall higher standards.

he push nature of insurance sales: In India, insurance is considered a push sale product. This is not good because when an insurer or intermediary pushes a product, there is little choice that is given to customers: and guite often. over-commitments are made. The high degree of sales push is evident from the fact that in most cases it is the insurer's employee or agents, who approach the customer to sell the product. A large proportion of urban India would have received cold calls/SMS to sell insurance products to them. As a result of such market practices, more than 80% of all non-life insurance transactions in India are intermediated by the insurer itself or its agents (the equivalent number in the US is less than 40%). This indicates that in India it is mostly the insurance company that chooses its customers rather than the other way round.

In an ideal situation you would want the intermediary to make the customer aware of the concept of different product lines and then, based on a customer's unique profile and needs, find the most suitable insurer and product. However, the focus of many intermediaries today is to convince the customer about the benefits of a particular product of a specific insurer. As a result there are several cases of misselling reported. In summary, this "push-

based" marketing approach has earned the industry a poor reputation.

IRDA's guidelines have raised the standard of selling but there is more to be done:

IRDA has introduced several guidelines to raise the standard of selling. This includes the distance marketing guidelines introduced earlier this year, the minimum performance standards for agents, a revamping of the training curriculum and most recently the web aggregator

> In an ideal situation you would want the intermediary to make the customer aware of the concept of different product lines and then, based on a customer's unique profile and needs, find the most suitable insurer and product.

guidelines. A requirement such as recording the solicitation conversation over the phone forces the intermediary to adequately train its staff and abstain from malpractices. Despite such prudent initiatives, the industry has a long way to go. Some of the problems are structural. Customers are often not provided the option of choosing the best coverage for themselves because of the prevalent distribution framework in the country. Two such examples are discussed below.

Take car insurance. Before one gets delivery of the car, one must buy insurance. Here is a situation when the customer actively wants to buy a product but runs short on choices. Almost all car dealers have a tie-up with a particular insurance company – often the key criteria in choosing an insurance company is the payment to the dealer rather than the customer prices. In any case the insurance cost is a small fraction of the car's purchase price. When the customer completes all the paper formalities, a small portion of the bill gets directed to the insurance sold by the dealer. Since the tariff system was abolished by IRDA, the cost of OD cover in motor has come down significantly. If customers had access to more than one insurer at the time of purchase, free market competition would have ensured a lower premium for the customer. Unfortunately in a majority of the cases this does not happen.

A similar situation arises in bancassurance. Banks have unparalleled access and trust of the customer. Customers have a huge dependence on banks primarily because of trade credit, which is a key determinant of success of the business. Because of this financial dependence, a large proportion of customers rely on their banker's advice to choose the best insurance. However banks are tied to only one life and one non-life insurance company. This hinders the bank's ability to provide choice and holistic advice to its customers. Banks are restricted to the service and commercial proposition offered by a single insurer.

Apart from the manner in which insurance is sold, the other challenge in the industry is the type of product sold. Invariably most salaried staff would have some form of insurance. However these are largely investment related products. Consider this statistic: the non-life insurance (which is largely risk cover for health and assets) penetration is as low as 0.6% compared to developed countries which have a penetration of 3-5%. This indicates a lack of focus of the intermediaries on pure risk cover.

# The Broker channel in India is considerably underdeveloped:

Therefore, the need of the hour is to further develop the independent broking channel. Currently this channel is underdeveloped. The UK is an excellent example of how significant the broking channel can be. London Economics prepared a report in March 2011 that reported that over 70% of general insurance business was distributed through brokers. In India, the equivalent number is less than 10%. India has been able to attract nine out of the top ten global insurance companies, however not even three out of the top ten global brokers are appropriately invested in the market. In the overseas markets, large brokers are bigger in size and scale than many insurers. There are several international broking networks that exist but have nominal presence in India – Uniba Partners, WBNglobal, Wells Fargo international brokers are examples of well recognized networks with just a token presence in India.

## A robust broker channel has several benefits for customers:

Establishing a robust broker channel has three distinctive benefits for customers – choice, expertise and customer servicing. Each of these is elaborated below:

#### Choice

There are about 50 insurance companies and as a result hundreds of product options. Unfortunately the benefit of this market diversity never reaches the customers if they purchase insurance through agents. Brokers by definition are not tied to any one insurer and have a bias to present as many options as possible to clients.

Also, brokers have a unique advantage as they can combine the life, non-life and health insurance requirements of a client.

> Take the example of Personal Accident covers. These are offered as standalone products by general insurers and riders by life companies. A broker can look across all these companies to pick the right option.

This allows brokers to work with relatively smaller companies in a profitable manner. Individual insurers and agents would not have the same economies of scale in serving small clients.

Another advantage is that a broker is not constrained by the boundaries of General, Health and Life insurance. Take the example of Personal Accident covers. These are offered as standalone products by general insurers and riders by life companies. A broker can look across all these companies to pick the right option. Health insurance is similar. Today Health insurance is offered by the general insurance, stand-alone health and life insurance companies. There are differences in offerings of these companies. For example, most Health insurance products offered by life companies are fixed benefit, long-term plans. This has the advantage of being multi-year long term plans but the fixed benefit may not fully cover the medical expenses. A broker can explain the nuances of these different product types to a client and pick the most relevant options.

#### Expertise

Brokers are constantly exposed to people and product offerings of different companies. Brokers participate in training programmes conducted by different companies. A few brokers are part of international broking networks. This puts brokers in a unique position to understand market trends and developments. A good broker will harness this information to create deep market expertise.

Such expertise has three main benefits. First, brokers educate clients about product options and then push insurers hard to develop the appropriate products. The result is a steady improvement in product quality. Second, brokers can express a client's case in a language that insurers understand. Quite often clients are at sea when faced with all the technicalities of insurance. Brokers bridge this gap. Finally, the expertise is vital in effectively managing the client's risk, particularly in volatile times.

In developed markets such as the US and UK, brokers attract the best and brightest entrepreneurial talent. People who have spent years in the industry take up the broking profession because it provides the highest level of customer service and satisfaction. Entrepreneurs find that the broking route provides them with excellent opportunities to serve customers in an unbiased manner.

#### **Customer Servicing:**

Because of the privileged customerbroker relationship, the broker has to build customer servicing capability. In fact the ability of a broker to retain a client, quite often depends upon its servicing strengths. When an insurance claim is made it is the broker who is always the customer's champion and pushes the insurer towards timely and appropriate claim payment. No insurer or agent can play this role adequately because of the inherent conflict of interest between the claimant and the insurance company.

## The Regulator and Industry also benefit from a strong broker network

Brokers offer several benefits to the regulator as well. The strong customer focus of a broker is an obvious benefit. Moreover, primarily because of their deep expertise, brokers can be a very effective route to collate consumer feedback on its guidelines and regulations. Brokers go Last but not the least; brokers are very effective in reducing the cost of distribution. The experience in several countries has been that intermediation costs reduce as the broking channel becomes better established.

through a rigorous screening process by the regulator. Fly-by-night operators are effectively screened out. Therefore, a robust broking channel will result in fewer customer grievances and mis-selling issues. Last but not the least; brokers are very effective in reducing the cost of distribution. The experience in several countries has been that intermediation costs reduce as the broking channel becomes better established.

The most startling example of the impact of broking is from the UK market where it is estimated that broking accounts for 1% of the UK GDP. If that were to happen in India then broking would be larger than the entire general insurance sector as it exists today!

The role of the regulator in developing

#### the broking channel:

The IRDA has a significant role to play in strengthening the broker's role in industry. First, it should attract high quality talent and capital in the channel. The quality of the players will be the foremost determinant of the development of the channel. Second, IRDA should incentivize focus on pure protection solutions. The low ticket size of pure protection plans and the current commission structure results in small absolute earnings for the channel. In the backdrop of low consumer awareness, the cost of acquiring a customer is high, hence the current compensation does not provide an economic rationale for intermediaries to focus on such pure risk products. Finally, in its developmental role, IRDA can educate customers on the advantages, roles and responsibilities of a broker.

We are still in the early years of the industry's growth in India. The best is yet to come. We expect that over time the market will mature and the broking channel will develop with considerable depth and robustness.

# Driving Microinsurance - Through Bancassurance

Anand Pejawar opines that taking into account the low awareness levels of the rural masses, and the large tie-ups that PSU banks have created over a period of time; Bancassurance offers an excellent opportunity for the insurers to exploit the untapped potential.

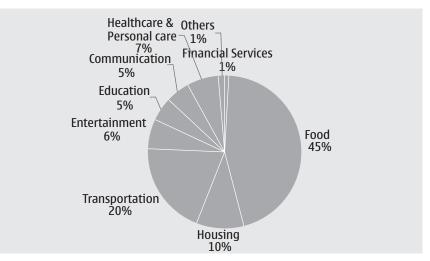

he real source of marketing promise is not wealthy few in the developing world, or even the emerging middle income consumers. It is the billion of aspiring poor who are joining the market economy for the first time".C.K.Prahlad

Rural India is the next 'big' opportunity. Indian rural market constitutes approximately 72% of total Indian population even as of date. This is spread across approx through 638,635 villages across the states and union territories of India. More than half of the Indian population residing in these areas hasseasonal income while the other part of the population draws irregular income. Majority of rural population is involved in farming sector either directly or indirectly (farming, marginal farming, and marginal land labourers etc) and the balance of the large population comprises of skilled labourers: artisans which includes carpenters, masons etc; and small scale shop owners etc.

Non-agrisector like infrastructure (construction, electricity, gas and water supply), rural health services, education, tourism, transport, communication etc. are all exhibiting high growth rates. Financial services providers like banks, mutual funds, Life & Non-Life insurers, card distributors, chit funds are aggressively looking at rural India for high growth rates. Several research reports state that by 2020 India is poised to have largest youth population in the world and as we all know, much of it will be from the rural hinterland of India.

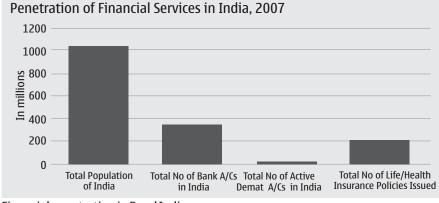

Looking at the spending pattern in Rural India, there is an immense scope for financial services, including insurance services.

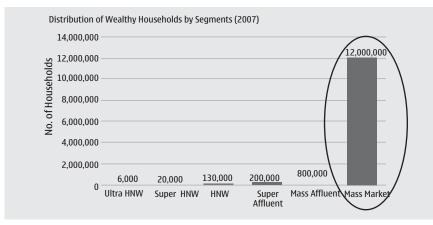

#### Spending pattern in India

#### Financial penetration in Rural India

Rural India is getting a large construction of mask market wealth.

Though some of the data would be dated the pattern is the same which we can see today. This is a good indicator of what is the current state of affairs in rural India. All the above data clearly proves that the higher need penetrated rural market offers tremendous growth protection for insurance companies both Life & Non-Life. But to achieve the same, there is a need to:

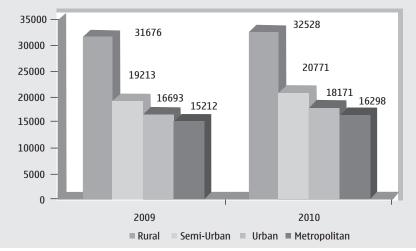

- a) Develop a cost effective financially viable and sustainable distribution channel with adequate regulatory control mechanism;
- b) Client awareness and confidence in the product including the channel through which it is distributed.

Traditionally, the banks (especially the PSU banks) have been providing all the financial security and stability to the rural

India. The loyalty factor of the rural population in this segment is very high. When we think of distributing of financial products like Micro Insurance, which have a long tenure (5 to 20 years) with low premiums and which require continuous and regular follow up in terms of collections and servicing, the bank is an excellent channel that can give financial stability, viability, consistency; and provide services by leveraging its trust and brand equity with its customers.

The inherent strength of the bank can do wonder in this channel as :

- a) **Reach:** Banks, especially the PSU banks, have the reach (approximately 37% of total bank branch operates in rural area and are classified as rural branches by Reserve Bank of India (RBI). Another 23.66% of the branches operate in this Semi Urban demarcated areas in India by RBI.
- b) Brand Equity and stability: Almost
   95% of these branches operating in
   Rural and Semi Urban India are
   pertaining to PSU banks. They have

|-----------------------------------|---|---------------------------------|--|--|
| Commercial PSU &<br>Private Banks | 55 Commercial Banks<br>With around 22,000<br>rural branches                                     | Quality resources               | Lack of reach; focus<br>on large accounts                                      |  |
| Regional Rural Banks              | 117 RRBs, with<br>15,000 branches<br>across 516 districts<br>and close to<br>62 million clients | Reach and relevant<br>clientele | Quality of resources<br>is an issue  |  |
| Cooperative Banks                 | 111,777 SCBs across<br>Rural Areas  | Granularity                     | Very fragmented<br>structure; Smaller<br>client base; poor<br>resource quality |  |

strong brand equity and stability which infuses tremendous confidence in the rural population.

C) Customer loyalty: Due to its very nature of being PSU bank branches which have entered rural India with a social obligation of meeting the financial inclusion objective, the customer loyalty is very high. They also disburse a lot of Govt. sponsored programmes to this population which requires this population to physically visit the bank branches.

Knowledge of customers financial and protection need: As these bank branches operated in limited geography and environment where usually population does not exceed 10,000 the bank branch officials are fully aware of the customer's needs, both financial and protection needs, as such this helps tremendously in understanding the customer "needs" and meet the same. against specific perils. This protection is in exchange of affordable premium, which is based on the likelihood and the cost of the risk involved.

**Purpose of Microinsurance:** The cover so provided should reduce the exposure and multiple risks; soften the impact of natural calamities and disasters; and provide an

Due to its very nature of being PSU bank branches which have entered rural India with a social obligation of meeting the financial inclusion objective, the customer loyalty is very high. overall economic and psychological security to the population.

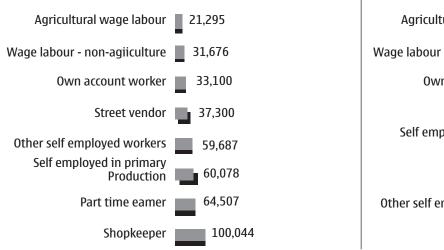

**Insurance & Banking Synergy:** We have all seen tremendous synergy between banking industry and life insurance industry, the same synergy could further percolate down to the rural India population as a perfect combination model of providing "one stop financial solution" to the rural population, which needs the most.

Possible route of distribution of Microinsurance products through bancassurance: Today, many of the PSU banks have promoted their own insurance company (Life & Non Life) or have tied up with some insurance company as a corporate agent.

In addition to their own branch network these PSU Banks also have another approx 15,723 branches of Regional Rural Banks (RRB) jointly sponsored by various State Governments, NABARD and these public sector banks. These RRBs operate in specific geographical areas and cater to the specific rural population with

#### Average Annual Income

#### Percent with Bank

specifically designed products in agriculture and micro financing arena.

These rural bank branches of PSU banks and RRBs are a wonderful vehicle for distribution of Microinsurance products to its customers giving tremendous benefits and wing-to-wing customer service, which is of prime importance in Micro insurance.

In a typical Micro insurance product (where the sum assured (SA) is between `5000 and`50000), the premiums are relatively very low as most of these products are pure term or term with return of premium. Some insurers also offer products which are on Endowment and Money Back platform in the market, which also fall under the categorization of Microinsurance. Here the premiums are higher than that of term with the return of premium and may not suit the requirement of the targeted population

When such products are offered to customers in rural India, it is only the trust factor in the bank branches which is leveraged to extend protection needs to the customer. Taking these products to the door-step of the customer, servicing the same year after year, ensuring collection of renewal premium and targeting a simplified claims process is the

> Taking these products to the door-step of the customer, servicing the same year after year, ensuring collection of renewal premium and targeting a simplified claims process is the key to success in distribution of such products.

key to success in distribution of such products.

A large number of PSU bank branches are themselves hugely involved in the formation Self Help Groups (SHGs) which is a huge community that could be catered through Micro Insurance products. In such cases banks become an aggregator of such SHGs, who in many cases are also involved in lending towards the activity of these SHG.

Challenges in distribution of Mirco Insurance products: As is the case with any other insurance product, even in Micro insurance there are huge challenges that are seen in the development and distribution of such products:

 a) Infrastructure: Due to the very nature of low premium products, it may not be physically viable for insurance companies to have their own offices to cater to this population in rural India. As such alternative distribution mechanism, which has long term perspective and well set regulated systems and procedures in place to manage premium collection and servicing is required.

- b) Medical Network: Establishing medical network in this area is another challenge which then restricts the development of certain types of products, which could be offered to rural population, which might necessitate medical examination, either pre or post issuance.
- c) Manpower: The quality of manpower available in rural India is low on knowledge and capability for distribution of these products. Secondly, rural markets are not a preferred location for employment of today's youth.
- d) Technology: This is another limiting factor and the challenge in servicing. The technology factor is a huge hindrance in remote underwriting and printing of policy document.
- e) Actuarial Limitation: Lack of correctness of mortality data available and veracity of lapsation data is another huge challenge in this segment.
- f) Awareness: Low awareness of life insurance itself and specially its products (the term, and term with return of premium) is a huge challenge in the segment. Low literacy rate, misguiding products or channels of distribution (multi level marketing where people have lost money) have created negative feeling towards such products.

Simple, affordable, customer friendly products are made available through the banking channel which takes care of presale, sale and post sale services.

products and in the absence of a structured collection mechanism, misappropriation of premium collection is another challenge faced by insurance company.

- h) Training: Logistic barriers in conducting training programs in rural area especially in the local language is another challenge that needs to be taken care of.
- i) Product Design: With the kind of population in rural India, with seasonal/irregular income, the design of the products is a huge challenge. The company has to ensure least transaction cost, the factors in difficulties in controlling moral hazards, achieving minimum levels of sales in spite of limited data and skills for actuarial analysis and reinsurance is a challenge.

From the research indices available and the kind of movement banks (specially

PSU banks) have taken upto run the Govt. sponsored financial inclusion programme, it has been observed in most of the categories of customers (depending on their Income levels, where the annual income falls between `20,000 to `100,000)they have been banking with some bank or the other. In such a scenario, it is very easy to develop and design specific product using the knowledge and expertise of the banker in respect of their customers and bring them into main stream of insurance protection. This can also been seen from the table given below.

It is win-win situation for all the stakeholders the customer, the bank and the insurer in such a tie up.

- a) For the Customer: Simple, affordable, customer friendly products are made available through the banking channel which takes care of presale, sale and post sale services. This becomes extremely convenient for customer specifically in the rural market.
- b) For the Bank: An excellent opportunity for cross selling or upselling comes in very handy for customer retention and getting a larger pie of its wallet. Also becomes an excellent tool to earn non - interest income in rural market where such opportunities are very limited.
- c) For insurer: Helps to utilize the large branch network of the bank to help penetrate deeper into rural pocket in the most cost efficient manner and leveraging on the strength and brand equity of the bank.

g) Fraud management: Mis-selling of

26

#### Technology Integration:

To help enable reach and provide post sale services. Almost all banks are today operating on core operating system. With this technological upgradation happening in banks, the insurer can achieve perfect integration of the two IT systems to provide the best of class service and ensure efficient and regular collection of renewals and also help in claims settlement. It has been observed that wherever banks and insurance companies have been in a position to integrate their IT systems, the penetration in the rural markets have been deeper, collection of renewals year after year have been better and claims settlement has been faster and efficient which is to the benefit of the customer.

Strategy which would be most effective to reach the desired target group is to have:

#### a) Simple Product:

- Easy to understand
- Easy to sell
- Easy to administer

#### b) Communication:

• All brochures, leaflets including proposal forms to be in local language.

- No hidden charges or small lettering which could confuse the rural population
- Plain, simple and easy to understand communication.

#### c) Integrated process:

- The process of pre sale, sale and post sale have to be simple and efficient.
- IT system in the bank should support processing with seamless integration with insurer's IT system.

#### d) Affordable:

- The premium charges on these products have to be affordable to the targeted population.
- They should be structured in the manner which should take care of seasonality/irregular incomes.

#### e) Reaching End Customer:

- Most important and critical aspects of sale.
- Needs to adequately educate the sales force.
- Equip them with necessary sales tolls to help reach the customer.

#### Untapped target for Microinsurance:

There is a huge population who are categorised as belonging to Below Poverty Line (BPL). The population, which is today covered under the MNEREGA scheme. Most of their payments happen through the banking system and is a perfect example of how this population which needs the protection the most is totally neglected. Apart from this we also have large Self Help Groups(SHG) operating in rural market, large unorganized sector, daily wagers and small organized group like weavers, fishermen, toddy tapper, farm laborer artisans etc., that can be tapped through the sale of Micro insurance products through the large Bancassurance channel.

The author is Executive Director, SBI Life Insurance Co. Ltd.

# Need for Pro-active Participation

- Bancassurance

Avinash Singaraju observes that the core business of bankers and insurers being vastly different from each other, they should strike a balance between the two if the Bancassurance channel is to make good and sensible progress.

he complexity of the Indian financial sector is growing rapidly. The banking system continues to be the most dominant segment of the sector, and the country's financial stability has been traditionally attributed to the functioning of this segment. However, in the more recent past, the other constituent segment of the financial sector viz., insurance is receiving due attention for its contribution to the financial stability of the economy as a whole.

Infact, banking and insurance are two different businesses, which pose different stability concerns. Banks enjoy a special position in the financial system that is derived from their core activity in the transmission of monetary policy, the payment system and the reallocation of savings to investments. The insurance companies on the other hand act as a conduit for households and firms to transfer risks to entities that are better suited to handle them. In this way, projects are undertaken that might otherwise be non-existent, and this contributes to economic growth. Insurance companies, like banks, mobilise funds from households and firms; and invest part of them in the non-financial sectors of the economy. Thus the interconnection between the two

segments from the perspective of financial stability is leading to increased interlinking between the two and the traditional segmental borders becoming blurred. This is clearly evident with increasing number of banks entering the insurance business and the enthusiasm of insurance companies to empanel the banks as their corporate agents to transact business. A new channel "Bancassurance" has thus emerged and is

> The insurance companies act as a conduit for households and firms to transfer risks to entities that are better suited to handle them. In this way, projects are undertaken that might otherwise be non-existent, and this contributes to economic growth.

growing more rapidly than all the other channels of insurance marketing with both insurance companies and banks getting eager to exploit the large database available with them.

In India, ever since espousing of financial reforms following the recommendations of Narasimham Committee, the contemporary financial landscape has been reshaped. Banks, in particular, strode into several new areas and started offering innovative products, viz., merchant banking, lease and term finance, capital market/equity market related activities, hire purchase, real estate finance and so on. Thus, present-day banks have become far more diversified than ever before. Therefore, their entering into insurance business is only a natural corollary and is fully justified too as 'insurance' is another financial product required by the bank customers.

Bancassurance, i.e., banc + assurance, refers to banks selling the insurance products. The term first appeared in France in 1980, to define the sale of insurance products through banks' distribution channels (SCOR 2003). This term is extremely familiar among the European countries as banks selling insurance products in most of these countries are a common feature. Banks

28

are beingused as an effective alternate channel to distribute insurance products either as 'stand-alone insurance products' or 'add-ons to the bank products' by way of combining the insurance with typical banking products/services. According to IRDA, 'bancassurance 'refers to banks acting as corporate agents for insurers to distribute insurance products. Literature on bancassurance does not differentiate if the bancassurance refers to selling of life insurance products or non-life insurance products. Accordingly, here 'bancassurance' is defined to mean banks dealing in insurance products of both life and non-life type in any forms. Quite reverse of the concept of bancassurance, there is also a concept known as 'assure banking' which refers to the provision and distribution of financial and banking services by insurance companies. However, this concept is not popular and is out of scope of the present discussion.

As far as banking sector's infrastructure is concerned, only a few countries could match with India for having largest banking network in terms of bank branches spreading almost throughout the length and breadth of the country. This is a direct outcome of the then prevailing deliberate policy thrust towards branch expansion. At end-March 2006, there were as many as 284 scheduled banks, of which 88 were commercial banks and 196 were Regional Rural Banks (RRBs). There were as many as 70,324 bank offices, of which, nearly 70% of the branches were located in rural and semi urban areas and the remaining around 30% were in urban and metropolitan areas. The number has only gone up from then on. On the other hand, the low penetration of the existing insurance business is by and large concentrated in and around the towns, cities and metros and still a vast majority of rural areas and even people in urban unorganised sector are to be covered. It is

Primarily with respect to acceptance of risk, the insurers are often compelled to accept their otherwise nonpreferred risks so as to protect their relation with the bank.

this contrasting situation that assimilates the two systems by way of 'bancassurance strategy' to reap the benefits of synergy. This is an opportune time for both banking and the insurance sectors to come closer and forge an alliance for their mutual benefit.

The concept of Bancassurance in the Indian context runs practically on the Referral model wherein the bank only provides the leads to the insurance company and does not get fully involved in policy servicing. It is the insurer who is responsible for policy servicing and the bank is only an intermediary. In practice however, there are a few areas where the conflict of interest crops up occasionally between the two partners viz., the banks and the insurers that get addressed provisionally but need a permanent and mutually acceptable solution for all times to come. A few of such sensitive issues have been addressed in the forthcoming paragraphs.

The banks play a dominant role in the bancassurance model as they are the prime distribution channel. The insurer is many a times left to the mercy of the sourcing channel i.e., the bank, thanks to the cut throat competition in the insurance domain and the difficulty of obtaining profitable premium in the open market. Since the premium income is more or less assured from the bank and that the claims experience is favourable in general, the insurers often bend to the demands of the banks even at the cost of their own risk management philosophy. Primarily with respect to acceptance of risk, the insurers are often compelled to accept their otherwise non-preferred risks so as to protect their relation with the bank.

With specific reference to the non-life segment, banks opt for encouraging insurance coverage to the assets they fund so that the financial interest of the bank is protected upon the occurrence of any unforeseen event causing damage to the property. Thus the bankers ensure that all their loan accounts are protected by insurance coverage. The valuation of the asset thus gets governed by the quantum of sanctioned loan and not the reinstatement value or the market value as the case may be. This becomes a gross violation of "Principle of Average" and subsequently affects the claim settlement too.

A small example can be cited to explain this process. A bank which advances a loan for a residential occupancy gets an insurance cover, typically a Fire policy for the entire loan value to protect its interest. However, it should be noted that the value of the loan sanctioned includes the land value in addition to the construction cost whereas insurance cover restricts itself to the construction cost. Thus, even in the case of a total loss, the customer ends up getting the value of construction cost and not the full sum insured even though the premium has been paid for the total value. Another dimension to this aspect is that the loan is not sanctioned to the full extent of the property value but maximum to an extent of 80% in general. In a different scenario, for a customer who approaches the bank for a part loan to augment his monetary requirements above his financial capacities, the bank again gets insured the property only to the tune of the sanctioned loan amount. This leads to gross under insurance and it should be noted that even the bank's financial interest may be in jeopardy at the time of a major loss incidence.

It should be noted that most of the clients unless they have a dedicated risk management system in place, are unaware of the consequences of such deviations in the valuation of their assets and the insurers seldom get an opportunity to convince either the bank or the client as the latter are too preoccupied with their core activities.

Though the banks have started participating actively in insurance business only in the recent past, they have been referring their leads to various insurers for guite some time and there is a laid down procedure for this process. Many a times, mostly with respect to industrial establishments, the loans are dispersed in instalments or as and when the client raises the request. However, the existing process of getting insured the loan disbursed does not accommodate the facility for passing an endorsement to include the enhanced sum insured or inclusion of new assets in the existing policies. Thus many policies are issued in a piece meal manner for the same risk facility only adding to the confusion at the time of loss.

Another area of concern is the determination of policy conditions which is seldom taken care of in referral bancassurance model. It is this area where the insurer uses his intelligence to protect himself. Increasing of applicable policy excess, inclusion of voluntary excess, exclusion of certain coverages are a few areas which may go against the interest of the client and the financial interest of the

Though the banks have started participating actively in insurance business only in the recent past, they have been referring their leads to various insurers for quite some time and there is a laid down procedure for this process.

bank itself if such terms are not clearly enlisted. Since the volumes are rather high and the average ticket size remains very small, it is impractical to verify each and every issued policy but a general agreement upon predetermined conditions applicable for various classes of risks can be agreed upon by the banker and the insurer right from the beginning so as to address this issue amicably.

As the discussion continues, there can be listed many such instances which need to be addressed proactively by both the bankers and the insurers so as to transact the business of insurance in a fair and just manner.

The bankers for whom selling insurance is only an additional job, should spare more time and provide proper and complete information to insurer as it is ultimately the reputation of the bank that is at stake and the bank is only trying to add value to its customer service by offering relevant insurance coverages. A product with wrong valuations, improper conditions and lacking vital coverages only adds to the sore experience of the client in case of any adverse happening implying moving away from the bank as well.

The insurers being professionals in this domain should go the extra mile in educating not only the concerned bank officials at the operating level but also the clients so that they get more involved in the process of getting the apt coverages with all correct parameters as a measure to ensure prudent risk transfer thus catering to the needs of the client as well as covering the complete financial interest of the bank.

To sum up, it can be said that bancassurance model has a long way to go in the progress of insurance business in India and the active and prudent involvement of both the banker and the insurer would surely add to customer delight and increased reputation to both the parties. Also, since there are more companies coming up in this particular form of tie-ups between banks and the insurers, providing the proper and satisfactory service to the client remains paramount to succeed in this ever challenging environment. Course correction at this nascent stage would help to avoid the many troubles which can crop up as the market becomes more complex.

# - The International Bancassurance Experience

Rohan Sachdev throws light on the strengths of the Bancassurance channel operating in more developed markets that can set a trend for the Indian insurance market in the years to come.

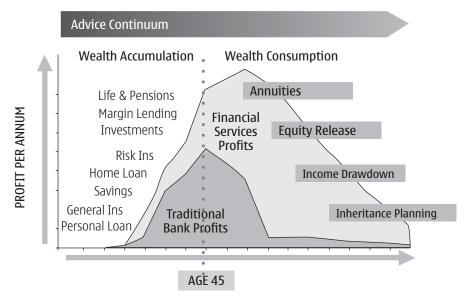

# ancassurance: Change is the only constant

Banking in India has a long and rich history. Global economic history indicates that it was trade with India for its primary produce that created the major global banks of the late 19th and early 20th century. The nation that was the causal factor of global banking is, even as of today, struggling to achieve a respectable level of financial inclusion for its citizens. While the banking regulator is seeking punitive regulations and enforcement to improve the penetration, it has been averse to increasing competition in rural banking (relaxing bank licensing norms for exclusive rural banking organizations). This however, is another debate for a different audience.

Internationally, it was probably the fabled concept of the "Man from Prudential" from the mid 19th century which, seemingly, evoked the concept that agency was considered as the core distribution channel. For a considerably long period of time, this remained the case. While banking increasingly became the 'financial house physician' of the classes, the concept of agency as the primary channel for insuring the masses, remained. Over time the masses became as important for a healthy banking system While banking increasingly became the 'financial house physician' of the classes, the concept of agency as the primary channel for insuring the masses, remained. and regulatory recognition of this fact too, allowed the bankers to channel insurance products.

To look at the banker's relationship with their customers, the stages can fairly be divided into two, the wealth accumulation and the wealth consumption stages. The bank's profits from the customer would continue to rise in the wealth accumulation stage and drop down in the wealth consumption phase. The financial services profits however, would continue to linger and reduce only gradually as shown in the figure below.

Figure 1: BFSI profits and Customer Life Stage

irda journal **January 2012** 

Since IRDA opened up Bancassurance and corporate agent channel for insurance distribution, the segment has stayed at the forefront of sales and distribution for the private life insurers. With a wide presence through its branch network, Bancassurance provided the basic launch pad for insurance products. The banks have found this instrument a steady source of fee income from retail clients, especially the mass and mass affluent segments. The insurers found a way to take on the monopoly of the sole public player with sizeable distribution.

The insurance regulator's focus on intermediation of insurance products and specific recommendations on Bancassurance makes us take a focused look at Bancassurance models. Given that the public player has little or insignificant presence in Bancassurance and corporate agency segment, the proposed new regulations could further fragment the private players, most of whom play a second fiddle to the public sector giant if not just maintaining a toehold.

#### The kaleidoscope: What we see

Looking at these global models would give us some insights into the progress of Bancassurance the world over and help us paint the canvas of the shape of things to come. The focus would be on the developed and the emerging markets. Study of underdeveloped markets would not assist the decision making and strategic thinking for practitioners in Indian Insurance.

It would be appropriate to consider Europe as a shape of things to come, given their centrist approach to economic planning, rather than the American (US) model. On the developing market front, we would consider emerging and large economies of Asia Pacific and Latin America (including Brazil). The reason for exclusion of Africa from our study is the relative underdevelopment. Africa can provide deep insights, but those would be in segments that need not necessarily be currently relevant to the Indian Insurance practitioner. Looking at these global models would give us some insights into the progress of Bancassurance the world over and help us paint the canvas of the shape of things to come.

Largely, Bancassurance can be split into three models: viz., Distributor (A bank which sells the products), Partner (Bank with a JV agreement with insurer) and Owner (A bank which sets up insurance subsidiary).

These segments of Bancassurance can be classified further with the level of integration between the banker and the insurer on the customer life cycle. This integration could be as basic as passing on the lead to the insurer or could extend to closing the sale and data entry as well as providing post sale services to the customer. A rudimentary product for basic 'distributor' would be the MRTA (Mortgage Reducing Term assurance) which holds ease of sale by the banker: The key issue is the explanation to the customer in simple terms on the product's purpose and concept. Other easy to sell products like single premium wealth plan which can be explained in the same manner as a long term fixed deposit at a bank would also be featured through such a segment of Bancassurance model.

Deeper integration can enable the banking force to be trained on more complex products and use the electronic tools to sell as well as collect premium and make data entry on the policy proposal. The ease of introduction of the products and the scalability of sales are the primary considerations while opting for the "Partner" or "Owner" model where costs and start-up time could be higher for both the banks and the insurers, but offer considerable control.

## Shape of things to come: The European experience

It was in the early 70s that lenders in France came up with the idea to bypass the middlemen to provide loan protection insurance for their customers. What started then was in the early 80s taken up in Spain in a big fashion with banks buying insurers. Until quite some time, it was a financial decision with banks not legally permitted to sell insurance until 1991.

Europe now has the highest Bancassurance penetration rate anywhere in the world, with the share of distribution accounting for more than 50% of the premiums in many of its markets.

The latest figures indicate that across Europe, brokers with 32% market share and Bancassurance with 30% market share lead the agency at 26% by a narrow margin. The remaining share belonged to direct sales. Life insurers in the medium term would move away from agency to direct sales. Regulatory changes are expected not just to impact the agency sales, but also impact Bancassurance.

Country-wise, UK, Netherlands, Germany and Greece are below the 50% mark in terms of Bancassurance contribution to the premiums. Portugal, Spain, France, Belgium, Netherlands, Norway, Italy and Finland are all countries where Bancassurance contributes more than 50% of the premiums.

In terms of the models, there seems to be a north-south divide. Germany, UK and Netherlands have the 'distribution' mode with banks acting as a commission paid distributor. Italy, Spain and Portugal with high Bancassurance penetration run the 'partnership' model of joint ventures. The 'ownership' model of insurance subsidiaries is more popular in France and Belaium.

Basel III norms may lead to some banks opting to sell insurance from multiple partners to make effective use of capital. Local and Euro level efforts to reduce or ban product bundling of insurance and bank products is also expected to impact the Bancassurance sales. Some of these challenges may compel the commoditization of certain product categories increasingly pushing sales through internet channels.

#### Sunrise in the emerging economies: Look to the East

Before we step into the truly emerging markets, it would be worthwhile for us to make a note of two Asia Pacific markets that are relatively mature even if they are not quite sizeable to the rest of the comparators: viz., Hong Kong and Australia. Bancassurance has been a successful strategy in Hong Kong with four organizations including a Hong Kong /London based global banker commanding a large share of the market. Australia is not too different with four of the biggest banking corporations garnering 43% of the share of premiums. In other mature markets like Singapore, Bancassurance commands lower levels of 27%.

In the emerging markets of Asia Pacific, the regional regulators are expected to be influenced more by the actions in Europe rather than in the United States. So the path adopted between the IFRS and Solvency II seems more specific to the regulator within the specified country. However, at an overall level, it would be interesting to see how US reporting obligations would approach areas of significant divergence.

These capital requirements, along with high growth make players in these markets seek more capital, be it for organic expansion or for mergers and acquisitions of players unable to keep up with the changing rules of the game. However, it needs to be considered that

The players who remain in these emerging markets are expected to bet significantly on leveraging the IT practices of developed (especially) European models to enable insurance penetration piggy-backing on the penetration of mobile banking and other technologically enabled financial solutions.

except for China where the foreign players have insignificant share of the market, the foreign partner would hardly accept a withdrawal from a major growth market. (China's foreign Life insurers hold less than 2% of the market, India has a 26% cap on the FDI, Thailand has increased it to 49%, Malaysia has it at 70%, Indonesia: 80% and Philippines and Vietnam at 100%).

Although China represented a 44% growth in Bancassurance premiums in FY 2010, this stood comparatively better than agency at 17% and short of the phenomenal growth showed in the internet insurance space. The figures for Malaysia and Thailand come at a low 45% and 30%. In Indonesia, the premium collected from Bancassurance would be in the range of 44%.

The players who remain in these emerging markets are expected to bet significantly on leveraging the IT practices of developed (especially) European models to enable insurance penetration piggy-backing on the penetration of mobile banking and other technologically enabled financial solutions.

In China, the premium is generated primarily from the four urban centers of Beijing, Shanghai, Guangzhou and Shenzhen, which contribute to more than 50% of the premiums. However, rapid urbanization indicates that insurers would focus on the tier 2 and 3 cities which are expected to urbanize sooner. Bancassurance contributes to 30% of the premiums, though the regulator, China Insurance Regulatory Commission (CIRC) is expected to promote alternate distribution channels like internet and telemarketing, even though Bancassurance has nearly 30% market share. This is also supported by the fact that there are over 100.000+ bank branches and post offices selling insurance products.

Some of the growth boosters for Bancassurance is the potential for future partnership / ownership model due to the actions of the banking regulator CBRC; and CIRC in 2009 - since the precedence over five major Chinese banks have invested in insurance companies and a major private insurer has invested in a bank.

#### Carnival of colours: Emerging markets of the Americas

The significant Latin American markets for foreign insurers are Brazil, Argentina, Mexico, Venezuela and Chile. The region's insurance penetration is in the range of 2 to 4%.

Though Brazil holds the largest insurance market population in Latin America (with nearly 50% of premium collection for the region), its 200 million population is much smaller than that of India or China. Liberalization has been a recent event in Brazil and foreign insurers are a recent phenomenon, even if they have already managed to capture a good 20% of the market. As compared to India or China, Brazil has a large middle class population at 50% of its population (as defined by the

# Trailblazers in Distribution

- The Agency Channel

Rajender Sud emphasises that in view of the low awareness levels in the Indian domain, there is need for a lot of personal advice at the time of selling a policy to a prospect and insists that it is the agent who is best-equipped to deliver the goods.

A ssurance from agents: Insurance has been always a 'matter of solicitation', even though many people would like to believe that it is a matter of persuasion. The life insurance market in India is undergoing a lot of changes that may eventually lead to how consumers will purchase life insurance. Today, insurers use various distribution channels, and even though some people would love to hate them for their persistent follow-ups, agents are the most preferred source for buying life insurance policies.

In India, agency sales accounts for 85 per cent of new business premiums. In a customer-centric industry like life insurance, it is a business imperative to constantly enhance the customer experience to ensure retention and to build loyalty. The first point of contact for the customer is the agent and hence the guide to the customer for providing sound solution.

### Why an agent is indispensable -

Low financial literacy and poor access to financial services in India pose a problem in penetration of the right kinds of life insurance products - more in terms of the right mix of savings and protection. This is combined with the fact that consumers lack understanding of the true purpose of life insurance. Consumers are not clued in about their life stage needs, and the product solutions suitable for such needs.

The merits of agent advisors are:

In a customer-centric industry like life insurance, it is a business imperative to constantly enhance the customer experience to ensure retention and to build loyalty.

- They usually enjoy personal credibility with customers.
- They provide various pre-sales and post sales services to customers.
- Due to personal contact, agents can provide valuable feedback about the need and expectation of consumers.
   This helps insurers to develop new products.

Customers struggle with various elements of the decision process when buying life insurance - the most difficult decisions being:

- Determining whether they are getting their money's worth
- Understanding the policy details
- Determining what type to buy
- Deciding how much to buy.

Agents help in all these decisions through various well researched tools provided by life insurers. Agents play a very important role in selling various policies to prospective customers. He is that person who acts as a mediator between the life insurer and the policyholder. With the market flooded with life insurance products of various companies that are almost similar, customers are bound to be confused. It is the agent who opens the knots of confusion from the customer's mind and suggests the most suitable plan after analysing customer needs and financial state.

Each family has its unique set of financial issues. That is why, it is important to share with the agent about the familys needs, aspirations and current state of financial affairs.

Individuals in the market for life insurance are much more likely to purchase life cover if through the need analysis an agent is able to recommend the amount of protection cover required by the individual.

What an agent can do after he gains the knowledge about the customer need:

Analyze and review needs of the customer: The agent will work with the customer to identify and prioritise his life stage objectives.

**Offer services to achieve that goal:** Based on need-based analysis, the agent will be able to offer life insurance products that will help the customer achieve his long term savings and protection goal.

Monitor progress; provide ongoing service as customer needs and situation change over time: Strategies need to be adjusted It is expected that the customer is candid with the agent advisor; after all he is not a mind reader. At the same time, the customer should be able to ask questions and get detailed explanation of everything the agent says.

periodically as your life changes. The agent will work with the customer over the years to help you to be on track with your changing needs.

A research by LIMRA has shown that consumers prefer to buy life insurance face-to-face. Life insurance buyers who meet face to face with the agents are the most likely to buy, about 7 out of 10.

On the other hand, life insurance buyers who use only the Internet while buying a product and never meet with anyone are the least likely to buy after the transaction - only 36 percent bought. Those consumers who started shopping on the Internet and then met with an agent advisor were 1. 5 times more likely to buy than those who only bought products online.

Not surprisingly, 41 percent of consumers said life triggers - getting married, buying a home or planning for children's future or experiencing the death of a relative or close friend were the reason they began to buy life insurance. If the agent already has information about enough the customer, he will automatically know about the changed scenario and suggest correct insurance policies.

But many consumers will initiate the process on their own. One quarter of life insurance buyers consider buying life insurance products because an agent initiated contact or suggested the need for life insurance.

### Agents and Mis-selling:

Should customers understand life insurance better to address the issue?

Mis-selling, whether it is a life insurance policy or any other product, has a lot to do with the awareness of the customer while purchasing a given and the product quality of communication between the manufacturer of the product and its eventual buyer. It is this aspect of communication that needs to be addressed vigorously to ensure that customers purchase a product that truly meets their requirements.

It is expected that the customer is candid with the agent advisor; after all he is not a mind reader. At the same time, the customer should be able to ask questions and get detailed explanation of everything the agent says. Insurers should adopt measures that will increase the awareness of customer on insurance so that they are able to take informed decisions. This can help achieve a drastic reduction in the number of insurance related controversies.

IRDA has made it mandatory for agents to attain persistency of 50% from this year. The benefit of the rule is that high persistency can only be attained by an agent through reduced mis-selling of insurance products and improved services. In many cases, the policyholder decides to discontinue the policy as it does not serve the purpose for which it was bought. With the new guidelines, agents will be forced to suggest products according to the customers needs. It will also improve the quality of advice to customers.

Life insurers have also started focusing on Life Time Value of customers and train their agents accordingly. Researches reveal that every individual buys 6-7 policies during the life time and it is much easier to sell to an existing customer. Agents need to understand the negative implications of mis-selling.

The Ideal advisor - Quality of advice It is easy to get advice from anyone on anything. But it is the quality of advice that is important. The main reason for dis-satisfaction among insurance buying customers is that they are not completely convinced about what they have bought. Life insurance is an intangible product and hence it is important for the agent to be able to provide comfort with pre and post sales service. A quality financial advice can help customers in many ways.

Advising individuals on a variety of financial needs can be a tough ask. It requires the agent to first, identify specific needs of the individual - that are unique and then design solutions that help meet these needs. The needs can be linked to the life-stage and lifestyle of the person. For instance, a young professional who has recently married will require life protection at a minimum to protect his loss of income and to cover his exposure toward any housing loan that he may have taken. On the contrary, a senior manager in an organization for wealth may be looking accumulation and retirement planning having already taken care of his basic life insurance requirements. Similarly, for an affluent businessman, insurance can help save taxes and provide an investment avenue.

Life insurance is an intangible product and hence it is important for the

agent to be able to provide comfort with pre and post sales service. A quality financial advice can help customers in many ways. The agent gives advice to the customer based on

- Understanding the life stage needs of the customer
- A realistic picture of the customers financial future or risks
- Information on how to manage the risks
- Information that will help the customer consider the financial options

However, there cannot be a one package that suits all. Each customer will have different needs, even if they have some common factors. Hence, each parameter, such as age, dependents, background, and family has to be measured before giving any advice to the customer. Insurers can develop tools that can be used to measure a customer profile by feeding in some basic data. This will enable the agent advisor to understand and offer products that will fit the customer.

The main constituents for quality of advice are:

**Need based advice:** If the customer has more than one need, it is important to highlight and advice on all their needs. Asses the customer's affordability and explain the potential results.

**Risk Profiling:** It is important to understand the risk taking ability of the family and accordingly recommend either a ULIP or traditional product.

## प्रकाशक का संदेश

है। इन बैंकों का नेटवर्क एवं पहुँच बीमा क्षेत्र को बढ़ाने के लिए एक अच्छा स्त्रोत माना जाता है । इस संबंध में बैंकंअश्यूरेंस महत्वपूर्ण भूमिका का निर्वहन करते हैं न केवल विभिन्न वर्गों की पहचान करते हैं बल्कि जरूरतमंदों को विभिन्न सेवा पहुँचाते हैं।

इसी प्रकार कॉर्पोरेट ग्राहकों के क्षेत्र में बीमा कम्पनियों की भूमिका केवल ग्राहकों को बीमा उत्पादों की पेशकश के साथ समाप्त नहीं होती है । एक कॉर्पोरेट इकाई जो कि कई खतरों का सामना करती है के लिए एक समग्र दृष्टिकोण लेकर एक प्रशंसनीय समाधान की खेाज करना एवं उपयुक्त जोखिम प्रबंधन पैकेज डिजाइन करना जो कि वर्तमान उद्योग की जरूरत है। इस लक्ष्य को हासिल करने के लिए, काफी अनुभवी एवं पढे लिखे ब्रोकर की जरूरत है जो कि उभरते जोखिम एवं संभावित समाधानों से पूरी तरह वाकिफ हो । ब्रोकर चेनल अधिक विकसित बाजारों में काफी महत्वपूर्ण सहयोग प्रदान करता है. और आशा की जाती है कि भारतीय बीमा क्षेत्र भी इसका अनुकरण करेगें।

'बीमा वितरण का महत्व' जर्नल के इस अंक का केन्द्र बिन्दु है । बीमा का महत्व बनायें रखने के लिए यह आवश्यक है कि बीमाधारक को सभी तरह की बीमा सेवा कुश्लतापूर्वक प्रदान की जायें । बीमाग्राहक सेवाएँ अगले अंक का केन्द्र बिन्दु होगा ।

भे हो। नारायय

जे. हरि नारायण अध्यक्ष

पूर्व उदारीकरण के समय में बीमा में मध्यस्थता का मायने एजेंट हुआ करता था, और बीमा विक्रय एवं सेवा के क्षेत्र में जो कुछ भी किया जाता वह एजेंट व्दारा ही होता था। एजेंसी चैनल अब बीमा क्षेत्र में काफी मजबूती से विकसित हो चुका है । देश के दुरदराज इलाकों में बीमा संबंधी प्रचार प्रसार काफी हद तक एजेंट व्दारा पूरी की जाती है, और इस प्रकार एजेंट ग्रामीण जनता और बीमा कम्पनियों के बीच अत्यंत महत्वपूर्ण कडी के रूप में पहचाना जाता है कयोंकि बीमा कम्पनियाँ शहरी केन्द्रों तक ही शिमट कर रह गई हैं । हालांकि सत्तर और अस्सी के दशक में शुरू हुई गरीबी उन्मूलन कार्यक्रमों के बुनियादी सिध्दांत वितीय सेवाओं को दलितों एवं गरीबों के दरवाजे तक पहुँचाने की आवश्यकता पर जोर देते हैं। ऐसी उम्मीद रखना कि बीमा कारोबार बैंकिंग कारोबार के समतुल्य होगा काफी महात्वाकांक्षी प्रतीत होता है । सार्वजनिक क्षेत्र की बीमा कम्पनियों का बीमा सेवाओं को दूरस्थ क्षेत्र में पहुँचाने का काफी बडा योगदान रहा है, एजेंटों ने भी इस कार्य को प्रतिपादित करने में एक महत्वपूर्ण भूमिका निभाई है।

बीमाकर्ताओं की प्राथमिकताएँ इस निजीकरण के दौर में तथापि अलग है और उन्हें अधिकतम संख्या तक पहुँचने की है बजाय उनके निवास स्थान तक पहुँच बनाने की । जबकि अधिक दुर्गम क्षेत्रों में कार्यालय खोलना निसंदेह अलाभकारी होगा, यह स्वीकार कर लिया गया है कि बीमा के लाभों को पहुँचाने से इनकार नही किया जा सकता केवल अप्रात्यता के कारणों को लेकर । बैंकों ने. विशेष रूप से सार्वजनिक क्षेत्र के बैंकं. देश भर में अपना जाल फैलाया है और आम जनता जो ग्रामीण क्षेत्र में निवास करती है के आसान पहुँच में बैंकिंग गतिविधि आ चुकी

एशियाई विकास की कहानी बरकरार हे। यह एक पहले से निष्क र्ष नहीं है, कई बातें गलत हो सकती है, लकिन एशिया दुनिया भर में सबसे तेजी से बढता हुआ क्षेत्र है।

> श्री रवि मेनन प्रबंध निदशेक मॉनेटरी अथॉरटी ऑफ सिंगापूर

प्रशुल्क नीति के हटने के बाद प्रीमियम के स्तरों में काफी गिरावट आई है। जहाँ तक बीमा कम्पनियों की वित्तीय सेहत का सवाल है यदि यह प्रवृति समाप्त नहीं हुई तब बीमा केम्पनियाँ वितीय संकट से ग्रस्त जायेगी।

> श्री जे. हरि नारायण अध्यक्ष, बीमा विनियामक एवं विकास प्राधिकरण, भारत

# आम आदमी की जरूरत है आम बीमा

जगेन्द्र कुमार का कहना है बीमा कम्पनियां व्यावहारिक तौर पर ग्राहकों की जरूरतो एवं वहन करने योग्य उत्पादों की संख्या पर जोर दे रही है ।

> बड़ा सकता है । सर्वाधिक जोर उस बात पर है कि उपलब्ध उत्पादों को सभी वर्गी तथा सभी क्षेत्रों में पहुचा कर उनकी जानकारी बढ़ाकर जरूरतमन्दों को बेचा जाये । इस दिशा में बीमा कम्पनियो बितरको मध्यस्थों तथा बीमा विनियामक के सामहिक प्रयास कार्यरत हैं ।

### रोटी कपड़ा और मकान :

आम आदमी की पहली प्राथमिकता होती है रोटी कपडा और मकान । जब यह आधारभूत जरूरते पूरी हो जाती है तो उसे उनकी निरन्तरता और सुरक्षा का ख्याल आता है । घटनाओं पर किसी का वश नही चलता । चाहे बाढ़ हो या आग, या फिर चोरी हो या डकैती । घर का कोई भी नुकसान आम आदमी को अन्दर तक हिला देता है । भावनाओ के नुकसान की भरपाई तो कोई नही कर सकता लेकिन ऐसे में गृह सुरक्षा या होम इन्श्योरन्स कुछ हद तक राहत अवश्य दोती है । मकान का बीमा तीन प्रकार से होती है ।

कटौती न होना, वैकल्पिक वाहन मरम्मत होने तक उपलब्ध कराना, आदि भी जोडे गये हैं । नये उत्पादों में अपहरण या फिरौती बीमा, शादी का बीमा तथा क्रिटिकल इल्नैस बीमा प्रमुख है । ग्रामीण क्षेत्रों के लिये भी मौसम बीमा तथा भूमिहीनो के लिये बीमा पालिसिया बाजार में उपलब्ध कराई गई है । आम आदमी की आम जरूरतों के लिये बीमा ही देश में आम बीमा के प्रवेशदर (पैनीट्रेशन रेट) को

> घटनाओं पर किसी का वश नही चलता । चाहे बाढ़ हो या आग, या फिर चोरी हो या डकैती। घर का कोई भी नुकसान आम आदमी को अन्दर तक हिला देता है ।

### आम आदमी की जरूरत है आम बीमा

आम बीमा आम आदमी की बुनियादी जरूरत बन गया है । साधारण बीमा कम्पनीया एक तरफ जहां देश की महत्वाकांक्षी चद्रयान परियोजनाओं के लिये बीमा सुरक्षा उपलब्ध कराती है वही दूसरे और यह आमजन की व्यक्तीगत, संपत्ती वाहन व सुविधाओं के लिये भी कवर मुहैया कराती है। जैसे जैसे देश में बीमा कम्पनियो की संख्या बढ रही है उसी प्रकार बीमा उत्पाद उपलब्ध कराने वाले चैनल तथा नये उत्पादों की संख्या भी बढ रही है । बीमा कम्पनियां व्यावहारिक तौर पर ग्राहकों की जरूरतो एवं वहनकरने योग्य उत्पादों की संख्यां पर जोर दे रही है। यही नही उपलब्ध उत्पादों में गाहक सेवा का विशेष ध्यान दिया जा रहा है तथा उन सभी व्यवस्थाओं को भी जोडा जा रहा है जो अन्य देशों में प्रचलन मे है । स्वास्थ बीमा पालिसी तथा मोटर बीमा पालिसी में केशलैस सेवाओं का जोडना तथा मोटर पालिसी में नये क्लाज जैसे हास की

फिल्मों से लेकर राजनैतिक हस्तियों समेत करीव एक करोड़ श्रद्दालु पहुचंते है । यहाँ प्रति वर्ष गणेश चतुर्थी पर गणेशोत्सव होता है जहां सभी टीवी कैमरे सुरक्षा कर्मी तथा मैटल डिटेक्टर सहित सभी सुरक्षा प्रबन्ध किये जाते है । इसके अतिरित बीमा सुरक्षा लेकर सभी व्यवस्थाओं को सुरक्षित किया जाता है । यही नहीं देश के सबसे धनी प्रमुख' मंदिरो की प्रतिवंर्ष बीमा सुरक्षा कराई जाती है ।

### कुदरत के कहर से सुरक्षा :

जापान में आये भूकम्प और इन्डोनेशिया में आये बाढ ने एक बार फिर यह साबित कर दिया है कि प्रकृति की असीमित ताकत के आगे मनुष्य पूरी तरह से लाचार है। आज पहले के मुकाबले ज्यादा प्राकृतिक आपदाओं की मार झेलनी पड़ रही है। उदाहरण के लिये. पिछले दशक में प्राकृतिक आपदाओं से प्रत्यक्ष तौर पर होने वाला नुकसान एक लाख करोड (1 ट्रिलियन डालर) पहँच गाया है जो पांच दशक पहले के मुकाबिले 20 गुना ज्यादा है । भारत भी रहने के लिहाज से बहुत सुरक्षित नही है। विश्व वैक के अनुमान के मुताबिक 603 जिलों मे से एक तिहाई इलाके भकम्प के लिहाज से खतरनाक है । उससे देश की करीब आधी आबादी के बजुद पर खतरा मंडरा रहा है । ऐसे में करोंडो लोगो की जिन्दगी दाँव पर लगी है। कहा जाता है कि किसी व्यक्ति की मौत से होनेवाले नुकसान की भरपाई तो नही की जा सकती. लेकिन पर्याप्त बीमा को मदद से अप्रत्याशित घटनाओं से होने वाली

घर के बीमा में केवल निर्मित भवन को ही ज्यादा खतरा होती है, जमीन को नही | आम आदमी को यह जानकारी उपलब्ध कराना भी आवश्यक है |

52,000 करोड रूपये के जेवर हैं। रोजाना ओसतन 70,000 श्रद्धालू भगवान के दर्शन को आते है। इस मंदिर के पास करीब 20 टन सोने और हीरे के जेवर है। कुछ जेवर 12 वी सदी तक पुराने है जोकि दुर्लभ है । सम्पत्तीयो की दुर्लभ प्रकृति और उसमें शमिल जोखिम को देखते हुए इसका बीमा प्रीमियम भी ज्यादा है । हाल के दिनो में देवताओ के आभूषणों की चोरी को देखते हुए तिरूमाला तिरूपती देवस्थानम (टीटीडी) ने भी करीब 52 हजार करोड़ रूपये के जेवरो का बीमा कराया है । इसी प्रकार मुम्बई के प्रसिद्ध लालबाग के राजा गणेश मंदिर के निकट 13 जुलाई को हुए विस्फोटों के मद्दे नजर कड़ी सुरक्षा व्यवस्था की गई है । इस मंडल की बीमा राशि भी वार्षिक 14 करोड़ रूपये हो गई है । लालबाग के राजा सबसे पुराने और प्रसिद्ध पूजा मंडलों में से एक है जहां

1. सिर्फ भवन का

- 2. भवन (मकान) तथा सामान का
- 3. मकान समान सहित अन्य पैकेज कवर

घर का बीमा सभी साधारण बीमा कम्पनियाँ उपलब्ध करती है । उसके तहत आग, विस्फोट, भूकम्प, बिजली गिरना, तूफान, बाढ, गैस लीकेज, वाटर टैंक या पाइप का फटना, चोरी डकैती या किसी भी दुधटना से नुकसान होने पर क्षति की पूर्ति होती है । जहा तक समान का प्रश्न है कपडें, बर्तन, ज्वैलरी, फर्नीचर, फिक्यर्स, इलैक्ट्रिकल, व इलैक्ट्रोनिक्स सामान की रिस्क भी पालिसी के तहत कवर की जाती है । अगर पैकेज पॉलीसी है तो इसी पालिसी में परिवार के सदस्यों की व्यक्तिगत दुर्धटना, स्वास्थ्य बीमा तथा ततीय पक्ष दायित्व भी शामिल हो सकते है । सामान भी घर के बीमा में एक वर्ग के तहत उपलब्ध हाती है जिसकी कीमत का आकलन भी बाजार मुल्य के आधार पर ही होती है । घर के बीमा में केवल निर्मित भवन को ही ज्यादा खतरा होती है, जमीन को नही । आम आदमी को यह जानकारी उपलब्ध कराना भी आवश्यक है ।

### इन्सान और भगवान ः

तिरूपति बालाजी दुनिया के सबसे धनी भगवान है । उनके पास मौजूद कुल सम्पत्ती आन्ध्र प्रदेश के कुल बजट का आधा है । इस राज्य का बजट एक लाख करोड़ का है । बालाजी की सम्पत्तीयों की जिम्मेदारी देवस्थानम के देख रेख करने वाले ट्रस्ट के पास है । तिरूपति बालाजी (भगवान वैंकटेश्वर के पास करीब हानि की काफी हद तक भरपाई की जा सकती है । भारत में आम बीमा कम्पनीयो के पास प्राकृतिक आपतियों से होने वाले नुकसान से सुरक्षा देने बाले उत्पाद उपलब्ध है । अकेली अग्नि बीमा पालिसी ही बाढ़, आन्धी, तूफान, आग, भूस्खल्न तथा भूकम्प से होने वाले जोकिम से सुरक्षा उपलब्ध होती है । यह पालिसी घर, दुकान, फैकटरी, मशीन आदि सभी प्रकार की सम्पत्तीयों के लिये उपलब्ध है । अगर खेती बाड़ी करने वाले के लिए फसल बीमा, मौसम बीमा तथा फल एवं पौधों पर बीमा से फसलो का सूखना, मौसम की मार झेलने तथा तबाही से सुरक्षा उपलब्ध हो जाती है ।

### आम बीमा की आमजन को जरूरत :

साधारण बीमा कम्पनियाँ जहां एक तरह पुर्तगाली फुटबालर क्रिस्टियानो रोनाल्डो के पैरो का 727 करोड रूपये (9 करोड पाउन्ड) का बीमा उपलब्ध कराती है वही दूसरी ओर ग्रामीण क्षेत्रों मे रहने वाले का भूमिहीनो की झोपड़ियां कृषि पम्पसैट तथा साइकिल का भी बीमा प्रदान करती है । हर आवश्यकता के लिये आज बीमा बाजार में पालिसी उपलब्ध है । यहां तक कि नौकरी में सथानान्तरण होने या मकान के शिफ्ट करने पर भी अपने घरेलू सामान के एक जगह से पैकिंग का दूसरी जगह ले जाने का भी बीमा होती है । जिसका प्रीमियम सामान मल्य के पांच पैसे प्रति सैकंडा से लेकर एक रूपये प्रति सैकंडा तक होती है। गुडस ट्रान्सपोर्ट के तहत बीमा कम्पनियों की प्रीमियम दरें न केवल अलग अलग पालतू जानवर परिवार के सदस्य की तरह ही होता है । उसके मरने पर पारिवार के सदस्यो को दुख होना लाजमी है ।

होती हैं बल्कि एक ही कम्पनी की अलग अलग भारवाओं और यहाँ तक कि अलग अलग ग्राहको के लिये अलग अलग दरे हो सकती है। घरेलू सामान के परिवहन के लिये अमुमन तीन तरह के बीमा कवरेज दिये जाते है । ये ही बेसिक रोड रिस्क कवरेज, आल रिस्क कवरेज तथा एक्सेस क्लाज से सम्बधित कवरेज उसमे आल रिस्क कवरेज ही सर्वक्षेष्ठ है । आम व्यक्ति को भी सामान चाहे वह घर में है. रास्ते में है, दुकान में हे, फैक्टरी में है या गोदाम में है बीमायोग्य है। आम व्यक्ति की कोई भी सम्पत्ति चाहे वह मकान, दुकान, वाहन, मशीन, विधुत्तिय उपकरण, गहने. बहुमूल्य कलाकृतिय उपकरण, गहने, बहुमूल्य कलाकृतियाँ आदि सभी बीमा योग्य है तथा उन सभी के लिये बीमा पालिसियाँ उपलब्ध है। ग्रामीण क्षेत्रों मे भी झोपड़ी कृषि पम्प बीमा, जानवर, खेती, ट्रेक्टर, पशुगाड़ी, मद्दली पालन मघुमक्खी पालन व्यक्तिगत दुर्घटना आदि सभी के लिये बीमा पालिसीयां उपलब्ध है।

### पालतू जानवरों का बीमा :

पालत जानवर परिवार के सदस्य की तरह ही होता है । उसके मरने पर पारिवार के सदस्यो को दुख होना लाजमी है । एक पालतू पशु परिवार के दिल में जो जगह बनाता है उसके निधन पर यदि उसकी बीमा पालिसी से यदि राशि मिल जाये तो दूसरा पालतू पशु ले यह दुख का माहौल काफी कम हो जाती है। अनुमान है कि देश के 27 प्रमुख शहरो में करीब 40 लाख पालतू जानवर है। जिनमे कुत्तों की तादाई सबसे ज्यादा है। इनका करीब 400 करोड का बीमा बाजार है। फिलहाल 50 करोड़ सालाना का पशु बीमा होती है लेकिन इसके बारे में जैसे ही जागरूकता बढेगी यह बाजार बेहद तेजी से बढ़ेगा । अलग अलग कम्पनियाँ बीमित राशी पर अलग अलग सीमा रखती है । कुत्ते आजकल बहुत महंगे और अच्छी तरह उपलब्ध हैं इनकी बीमा राशि पर 3-5 फीसदी प्रीमियम लिया जाता है । रोग. बीमारी. अपंगता और अचानक मौत के लिये कुत्ते का बीमा कराया जाता है। उसके लिये पशु चिकित्सक या स्थानीय कुत्ता क्लब सर्टिफिकेट जरूरी होती है । रेबीज, कैनाइन डिस्टेंम्पर, लैप्रोस्पीरोसिस जैसी

बीमारियों की सूरत में कवर केवल तभी मुहैया कराया जाता है जब इन बीमारियो के खिलाफ एहतिषाहती टीके लगवाए गये हो । इसके अलावा आंशिक या स्थायी अपगंता, जानबूझकर पहुँचाई गई चोट, जहर खाने पर नजर अन्दाज करना, ब्रीडिंग और प्रेग्नेन्सी कवर के तहत नही आता । हालांकि अतिरिक्त प्रीमीयम का भुगतान करने पर इघर उधर ले जाने पर मृत्यु दुर्घटनात्मक रूप से जहर शरीर में पहुँचने जैसे जोखिम का कवर किया जा सकता है।

### शादी विवाह का बीमा :

भारत में शादी एक भव्य एक महत्वपूर्ण आयोजन होता है । शादियों में सजावट. खाने पीने. बैडंबाजे तथा आयोजनों पर भारी रकम खर्च होती है । ऐसे बड़े समारोहो में कोई भी किसी भी तरह की दुर्घटना के बारे में नही सोचता । लेकिन दुर्घटना तो बिना बुलाये आती है । ऐसी स्थिति के देखते हुये ही वैडिंग बीमा पालिसी की अहमियत बढजाती है । भारत में वैडिंग इन्डस्ट्री करीब 2.25 करोड रूपये की हो गाई है । इस समय शादी पर होने वाले खर्च की लागत 10 लाख रूपये से लेकर 1 करोड रूपये तक पहुंच गई है। जिसमें फोटो, वीडियों शूटिंग, गारमेंट हाल. आर्क्रेस्ट्रा. आदि गतिविधिया आवश्यक हो गई है । इन सभी गति विधियो को देखते हुये अतिरिक्त सुरक्षा की दरकार होती है जो बीमा पालिसी के रूप में उपलब्ध है । आधिकतर बीमा कम्पनिया वैडिंग इन्श्योरेन्स को इवेंट इन्श्योरेन्स के तौर पर बेचती है । बीमा में निजी दुर्घटना, कार्यक्रम के रद्द होने या टलने, इवेंन्ट स्थल की प्रोपर्टी को नुकसान पहुचने आदि को कवर किया जाता है । पालिसी को किसी की जरूरत के मुताबिक कस्टमाइज्ड भी किया जाता है । जैसे फूड पाइजनिंग या कार्यक्रम के रद्द होने या टलने का खतरा । ज्वैलरी की चोरी तथा दुल्हा या दुल्हन की वजह से कार्यक्रम के रद्द होने के भी कवर कराया जा सकता है । अगर मेरिज हाल को नुकसान पहुचने से कार्यक्रम रद्द होती है या टल चाता है, तो यह रिस्क भी कवर कराई जा सकती है । यहां तक कि आतंकी हमले की रिस्क के लिये भी कवर उपलब्ध है । सामान्य तथा

> भारत में शादी एक भव्य एक महत्वपूर्ण आयोजन होता है । शादियों में सजावट, खाने पीने, बैडंबाजे तथा आयोजनों पर भारी रकम खर्च होती है । ऐसे बड़े समारोहो में कोई भी किसी भी तरह की दुर्घटना के बारे में नही सोचता ।

वर वधू के पक्षों में झगडे की वजह से टलना कवर नही होती तथा आपराधिक षड़यत्र या जानबूझ कर की गई गल्ती को कवर नही किया जाता है । वैडिंग इन्शयोरेन्स एक गैर स्टेन्डर्ड उत्पाद है और इसमें दावा करने के लिये सर्शत की आवश्यकता हाती है जैसे चोरी के केस में एफ आई आर की माल के केस में बिल की आदि ।

### महंगे मोबाइल का बीमा ः

संमाचार क्रान्ति के इस युग में मोबाइल आज हर व्यक्ति की आवश्यकता बन चुका है । मोबाइल के खो जाने, कही भूल जाने या चोरी हो जाने की घटनाऐं आम हो गई है । इसलिये अधिकांश लोग अब अपने मोबाइल की सुरक्षा बीमा पालिसी लेने लगे हैं । बीमा कम्पनियों की मोबाइल फोन इंश्योरेन्स स्कीम के तरह आग. दंगे. आतंकवादी घटनाएँ खो जाना या चोरी हो जाने की रिख्क कवर की जाती है। पर युद्द व परमाणु हमले की वजह से हर मोबाइल डैमेज को कवर नहीं किया जाता । उसके अलावा अगर मोबाइल कस्टम पालिसी या अन्य किसी सरकारी एजेन्सी द्वारा किसी भी हालत में जब्त किया जाता है तो भी बीमा कवर प्रणाली नही होती माबाइल के खौने या भूलजाने या चुराये जाने में गल्ती बीमाधारक की प्रमाणित हेन पर वह लापरवाही के कारण दावा राशि पाने से वंचित कर देगी । मोबाइल की सुरक्षा की पूरी जिम्मेदारी भी बीमाधारक की है इसे लावारिश छोड़ना भी जानबूझ कर की गई लापरवाही कहलायगी । कुछ बीमा

लोकप्रिय नही है यह हाउसहोल्डार पालिासी के साथ ही उपलब्ध हो जाती है। एक वकील को उसका क्लाइंट यह एम समझ करके की उसे यथोचित सेवा नही दी गये है तो वह भरपई के लिये दावा कर सकता है। डाक्टर को असंतुष्ट मरीजया उसके परिजन सेवा में कमी का दोषी मानकार या उसके इलाज में लापरवाही वरतने पर आदालत में घसीट सकते है । चार्टर्ड एकउन्टेन्ट की जरा सी चूक होने पर उसका क्लाइन्ट लाखो का घाटा उढा सकता है और न्यायपालक का दरवाजा खटखटा सकता है । तब पर्सनल लायबिलिटी इन्श्योरेन्स पालिसी के तरह अदालत द्वारा तथ हरजाने का भुगतान बीमा कम्पनी द्वारा किया जायेगा । भारत में सामान्य बीमा का बिकास उत्तरोत्तर वृद्धि पर है । प्रति वर्ष बढता हुआ यह व्यापार अब 50,000 करोड का आकंड पार कर गया है । 24 सामान्य बीमा कम्पनियों ने 200 से भी अधिक उत्पाद बाजार में बिकी हेतु उपलब्ध कराये हुये है किन्त जागरूकता के अभाव में केवल गिने चुने ही उत्पाद सामान्य जन तक पहुँच पाते है । यध्यपि शिक्षित वर्ग के लिये बोकर तथा कार्पोरेट एजेंट जैसे चैनल उपलब्ध है किन्तु उत्पादों की तुलनात्मकता अभी आम नही हुई । इन्टरनेट के माध्यम से बहुत सी कम्पनीयों के उत्पादो की बारे तथा उपलब्ध फीचर्स की स्थिति को देखा जा सकता है। इन सभी विषय परिस्तिथियों के बावजूद सामान्य बीमापालिसी की मांग में बढोतरी हुई है। आज जहाँ क्रिकेट मैच का बीमा

अधिकांश लोग पैकेज या ब्लैंकेन्ट कवर लेकार उसीमें से अधिकांश खण्ड चून कर अपने जोखिम को सुरक्षित कर लेते है । बीमा सुविधाओं को बेहतर बनाने में ओम्बडसमैन तथा बीमा विनिमयक भी अपनी सकिय भूमिका अदा कर रहे हैं । 121 करोड़ की जन संख्या वाले देश में सभी विस्तार की अपार संभावनाए है । नये बीमा कर्ता, मध्यस्था, सर्वेक्षक तथा पुनः बीमाकर्ताओं के लिऐ अभी पूर्ण अनुभव तथा संामवनाओं से भरा वजार है।

पालिसी, हाउस इन्श्योरेंस पेकैज पालीसी या ट्रेवल इन्शयोरेन्स पॉलिसी के साथ आती है । भारत में प्रोफेशनल संबंधी मुकदमेबाजी कम होती है । लिहाजा पर्सनल लाइबीलटी पालिसी ज्यादा

कम्पनिया अपने प्लान के तहत मोबाइल, लेपटाप, कैमरा व प्रोजेक्टर का भी बीमा करती है। मोबाइल पालिसी का प्रीमियम इसके मूल्य का 1-2 प्रतिशत तक ही होती है। ऐसी पालिसियाँ स्पेशल कन्टीजेन्सी के तहत आती है। कि भारत के 53 फीसदीं व्यक्ती को मोबाइल फोन चोरी जाने या खो जाने का जोखिम होता है। से होने पर बीमा कम्पनी मोबाइल हैंड सटे की कीमत या रिप्लेएमेन्ट वैल्यू का भुगतान करती है।

### स्वतन्त्र व्यवसायियों के लिये बीमा :

आधिकांश प्रोफेशनल्स अपना स्वतन्त्र व्यवसाय करना पसन्द करते है । जिसमें उनका अपना आफिस, अपना संचालन, अपनी पूँजी तथा अपना ही प्रबंध जोखिम निहित है । डाकटर इंजीनियर, वकील, चार्टड एकाउन्टेन्ट आदि प्रोफेशनल्स को आसामाथिक मुसीबतो का सामना भी करना पड सकता है। अपनी जरा सी चूक या असावधानी के कारण । उस स्थिति में उन्हे प्रोफेशनल इन्डैमिनिटी पालिसी का सहारा होता है जो उनकी लापरवाही या गल्ती से हुये जोखिम के लिए प्रतिपूर्ति प्रदान करती है । यही नही उनके लिये पर्सनल लाइबािलिटी इन्श्योरेनस भी उपलब्ध है जो अत्यधिक मुसीबतों में अधिक सुरक्षा प्रदान करती है । यह पालीसी कम्पनियाँ उन डाक्टर, इंजीनियर, अकौन्टेंट. चार्टड एकौन्टेंट. करोबारी आदि के लिये भी लेती है जो उनके यहां वतौर कर्मचारी कार्य करते है । आम तौर लाइबीलिटी पर पर्सनल डन्श्योरेंस

45

वक्त के साथ साथ आम आदमियों की जरूरते भी बढ़ती जा रही है और साथ ही बीमा की आवश्यकता भी।

अधिकांश लोग पैकेज या ब्लैंकेन्ट कवर लेकार उसीमें से अधिकांश खण्ड चुन कर अपने जोखिम को सुरक्षित कर लेते है । बीमा सुविधाओं को बेहतर बनाने में ओम्बडसमैन तथा बीमा विनिमयक भी अपनी सक्रिय भूमिका अदा कर रहे हैं । 121 करोड़ की जन संख्या वाले देश में सभी विस्तार की अपार संभावनाए है । नये बीमा कर्ता, मध्यस्था, सर्वेक्षक तथा पुनः बीमाकर्ताओं के लिऐ अभी पूर्ण अनुभव तथा सामवनाओं से भरा वजार है ।

होता था वहीं ऐसी महंगी एवम खर्चीली इवैन्टस का भी बीमा होने लगा है । यात्रा के समय द्रेवल इन्श्योरेन्स जरूरत बन गया है। विदेश शिक्षा पर जाने वाले भी बीमा कवर लेकार ही तालीम लेने जाते हैं । कर्मचारियों एवं व्यपारियो को भी अपने बीमित होने या न होने की जानकारी होती है । अनेक जरूरतों के लिये अब अनेक पालिसियों की जरूरत नही होती । अधिकांश लोग पैकेज या ब्लैंकेन्ट कवर लेकार उसीमें से अधिकांश खण्ड चुन कर अपने जोखिम को सुरक्षित कर लेते है। बीमा सुविधाओं को बेहतर बनाने में ओम्बडसमैन तथा बीमा विनिमयक भी अपनी सक्रिय भमिका अदा कर रहे हैं। 121 करोड की जन संख्या वाले देश में सभी विस्तार की अपार संभावनाए है। नये बीमा कर्ता, मध्यस्था, सर्वेक्षक तथा पुनः बीमाकर्ताओं के लिऐ अभी पूर्ण अनुभव तथा सामवनाओं से भरा वजार है। देश में

Insurance Institute of India conducted a Seminar on 'Economic Capital Requirement & Financial Condition Reporting' (ECR+FCR) on 16th Dec. 2011 at Mumbai. Consequent to IRDA's announcement of norms on Economic Capital Requirement (ECR) and Financial Condition Reporting (FCR), the subjects have been engaging the attention of Indian life and non-life insurers alike. During the last few months, insurers have been in the process of empowering their professionals in actuarial, finance, reporting and underwriting streams with the requisite knowledge and skills for complying with the new norms. The norms being relatively new, gaps do exist at conceptual and implementation levels. The need for clarity in understanding, uniformity in interpretation and hassle-free implementation has been voiced by many insurers; and hence the relevance of the seminar.

Mr Liyaquat Khan, President Institute of Actuaries of India delivering the inaugural address. Also seen in the picture are: (L to R) Mr P.K. Rath, Director College of Insurance; Mr Sharad Shrivastava, Secretary General, Insurance Institute of India; Mr A.R. Sekar, (Officiating Chairman) Director and FA, New India Assurance Co Ltd.; and Mr S.Venkataraman, Company Secretary, United India Insurance Co Ltd.

Panel Discussionbeing kicked off by Dr George E Thomas, Associate Professor (Non-Life), Insurance Institute of India. Other participants in the panel discussion are (L to R): Mr P.K. Rath; Mr A.R. Sekar; Dr Rajesh Dalmia, Associate Director, Ernst and Young; Mr S.Venkataraman; and Mr K.S. Gopalakrishnan, Appointed Actuary & CFO, Aegon Religare Life Insurance Co.Ltd.

# Statistical Supplement (Monthly - October, 2011)

## BE WISE.

# ULIP-WISE!

If you have not already provided for regular income/pension during your retired life, consider a Unit Linked Pension Plan. In a Unit Linked Pension Plan your money is invested in a fund of your choice such as equity, debt, liquid etc. At the end of the waiting period, the pension payout by the insurer commences in the form of annuity.

Please go through the following before deciding to buy a ULIP (Pension):

- 1. Equity investments are known to be risky even though they have a higher earning potential in the long run. Debt investments offer returns that are more steady and have a lower element of risk. Choose the funds that are most appropriate to your risk appetite.
- 2. If the term is too short, the policy accumulation would be insufficient for a pension corpus. If you stretch the term too long, you may end up being required to pay premium when you would actually like to receive pension payouts.
- 3. Decide on the type of annuity that suits you. Annuities are normally available with provision for annuity to spouse after lifetime, lump-sum corpus to successor etc.
- 4. Fix the right level of premium contribution in a pension policy ensuring that adequate pension is created.
- 5. There is a free-look period of 15 days for you to decide to hold on to your policy or cancel it if you disagree with the terms and conditions therein.

The recent financial crisis underscored that even financially strong insurance groups and conglomerates may suffer significant distress and become globally systemically important when they expand significantly into non-insurance activities.

Mr. Peter Braumüller Chairman of the IAIS Financial Stability Committee

We will go beyond the traditional approach of ensuring transparency at point of sale to intervening by stopping products being sold that we judge cannot be sold safely.

Mr. Clive Adamson Director of Supervision, FSA, UK

It might be possible to argue that in a system of mandatory retirement savings where members have no choice not to be part of the system, the funds and regulators have an even greater obligation to ensure that confidence in the system is maintained.

### Mr. Ross Jones

Deputy Chairman, Australian Prudential Regulation Authority

We believe it is crucial for us to sort out issues to be tackled that have been highlighted through our post-disaster response to date. Following that, we need to enhance preparedness for the probable occurrence of large-scale disasters, as well as to promote the market penetration of general insurance including Earthquake Insurance.

### Mr. Shuzo Sumi

Chairman, General Insurance Association of Japan

The Asian growth story remains intact. It is not a foregone conclusion, many things can go wrong, but the odds are that emerging Asia will remain the fastest growing region in the world.

### Mr Ravi Menon

Managing Director, Monetary Authority of Singapore

After de-tariffing, the premium has come down to a level where questions arise about the health of insurance firms. If the trend does not abate, then the firms will be in trouble.

Mr. J. Hari Narayan Chairman, Insurance Regulatory & Development Authority, India
