## Ref: IRDA/NL/MTP/2015-16/EXDRF

## Exposure Draft on Revision in Premium Rates for Motor Third Party Insurance Covers for the Financial Year 2015-16

The Authority vide its order no. IRDA/NL/NTFN/MOTP/066/04/2011 dated $15^{\text {th }}$ April 2011 notified that it would review and adjust the premium rates for motor third party insurance covers annually based on the formula as given hereunder:
$\mathrm{P}(\mathrm{t})=\mathrm{C} 1(\mathrm{t}) * \mathrm{CII}(\mathrm{t}-1)+\mathrm{C} 2(\mathrm{t})$
Where,
$P(t)$ is the motor TP premium applicable to the financial year ' $t$ ',
$\mathrm{ClI}(\mathrm{t}-1)$ is the Cost Inflation Index for the year ' $\mathrm{t}-1$ ' as notified by CBDT, and
$C 1(t)$ and $C 2(t)$ are the parameters applicable to the financial year ' $t$ ' whose values shall be determined and notified by the Authority in each financial year based on the experience measured in terms of average claim amounts, frequency and expenses involved in servicing the motor TP business. The values of the parameters $\mathrm{C} 1(\mathrm{t})$ and $\mathrm{C} 2(\mathrm{t})$ may vary according to the class of vehicle.

Accordingly, the Authority had reviewed and adjusted the premium rates for the FY 2012-13 vide its order no. IRDA/NL/NTFN/MOTP/076/03/2012 dated $27^{\text {th }}$ March 2012, for the FY 201314 vide its order no. IRDA/NL/NTFN/MOTP/061/03/2013 dated $26^{\text {th }}$ March 2013 and for the FY 2013-14 vide its order no. IRDA/NL/NTFN/MOTP/098/03/2014 dated $27^{\text {th }}$ March 2014

In view of the above, the Authority hereby issues this exposure draft on revision of premium rates for motor third party insurance for the FY 2015-16 and invites comments on the proposed rates from all the stakeholders concerned.

## A. The Factual Data:

The Authority has made use of the data supplied by the Insurance Information Bureau (IIB) for the experience period of the Underwriting Years (i.e. Policy Years) from 2007-08 to 2013-14 in respect of no. of policies, no. of claims reported and amount of claims paid up to $31^{\text {st }}$ March 2014. The data is given in Annexure I.

Parisharam Bhavan, 3rd Floor, Basheer Bagh, Hyderabad-500 004. India.

E-mail : irda@irda.gov.in Web.: www.irda.gov.in

## B. The working of the Rate Revision:

## Data Used

1. The paid claims data in respect of each of the underwriting years starting from the year 2007-08 to 2013-14 is given by the Insurance Information Bureau (IIB) of India. The claims paid data in respect of all the $u / w$ years paid in financial year 2007-08 to 2012-13 was provided by the IIB last year. The IIB has provided now claims paid data in respect of the above u/w years in the FY 2013-14, in addition to the claims paid in FY 2013-14 for the u/w year 2013-14
2. The paid claims data for a particular $u / w$ year is in the form of that paid in the same financial year, paid in the next financial year and so on till financial year 2013-14.
3. The analysis has made use of the combined data (i.e. all types of claims paid in respect of all the causes of loss)
4. The claims data as mentioned above are provided by the IIB for each of the vehicle category as per the classification maintained by it.

## Basic Methodology

1. The ultimate claim costs for each $u / w$ year are estimated using Chain Ladder Method (Development Technique) applied on Cumulative Paid Claims Data
2. The main characteristic of the technique is that ultimate claims for each $u / w$ year are estimated from the recorded values to date, assuming that the future development of claims is similar to the claims' development of prior years
3. Thus the basic assumption of the technique is that the past is indicative of the future and that the future development of claims is similar to that experienced in the past.
4. The selection of age-to-age-factors (ATAFs) is done after considering the various averages of ATAFs, like simple average, geometric average, volume-weighted average, medial average (excluding one high and one low value)
5. Selection of Tail Factor:

- It is observed that the ATAFs for the most mature development periods available are significantly greater than 1.00 . However, this is not surprising considering the fact that the motor third party insurance is a long-tail line of business
- The effect of the above is to select a tail factor which will project the claims from the latest development period to the ultimate
- The selected tail factor depends on the type of vehicle. In majority of the cases, the tail factor is assumed at 1.15 and 1.20

6. With the use of cumulative development factor (age-to-ultimate), and the latest cumulative paid claim amount for a particular $\mathrm{u} / \mathrm{w}$ year, the ultimate claim amount is then estimated for each u/w year.
7. Trending: The ultimate claims for each $u / w$ year are then trended for changes in claim frequencies, claim inflation etc to the level of $u / w$ year 2015-16.
The projected ultimate claims are needed to adjust for underlying trends expected to occur between the experience period and the projected period. The main factors to consider are: changes in economic inflation \& other economic conditions, changes in social environment, changes in court awards etc.
8. The pure premium for $\mathrm{u} / \mathrm{w}$ year 2015-16 is then selected by taking average of these values for some/all the available $u / w$ years (ie., assigning different weightage to the value coming from different $u / w$ years)
9. The trended pure premium (to the level of $u / w$ year 2015-16) is then adjusted for management expenses to arrive at premium payable for $u / w$ year 2015-16
10. The development technique is used for each vehicle category

## Assumptions

- The investment income has not been considered in the calculations
- The management expenses are taken at $15 \%$ of premium (i.e. variable expenses)
- The loss trend is taken at $10 \%$ pa for all the classes of vehicles
- The fixed expenses for private cars \& two wheelers are taken at Rs. 25 per policy, whereas for commercial vehicles category of classes ' $A$ ' \& ' $C$ ' (except C4), the same has been taken at Rs. 50 per policy. The rest of the classes may be assumed to have FE of Rs. 25 per policy.
- Each category of vehicle has certain sub-categories. The IIB has treated the policy records as "Others" where there is no clear sub-category code. The "Others" subcategory has not been considered for the calculations for classes other than Commercial Vehicles where the proportion of this sub-category is low as compared to other subcategories
- The business mix of subclasses within a vehicle class does not change substantially over the next year

## The Premiums

The values of the parameters $\mathrm{C1}(\mathrm{t})$ and $\mathrm{C} 2(\mathrm{t})$ and the premium proposed for the financial year 2015-16, i.e. for the period from $01^{\text {st }}$ April 2015 to $31^{\text {st }}$ March 2016 are given in Annexure II. The parameter C1 ( t ) incorporates the frequency, severity and the variable expenses for the subclass; whereas the parameter $\mathrm{C} 2(\mathrm{t})$ incorporates the fixed expenses.

For commercial vehicles where the sub-category "others" is a major proportion of the overall, it is included in the workings.

The data is not available for two classes: Class F (ii), and Class B: Trailers. As there was no data available for class F (ii), the Authority has assumed the same \% increase for class F (ii) as that for the class F (i). In case of trailers (Class B), the Authority is of the view that the premiums for this class be increased by the increase in Cost Inflation Index over the previous year, i.e. 9.05 \%.

The average settlement size of a death claim for the industry is as under:

| THIRD PARTY LIABILITY CLAIMS (DEATH ONLY) > Rs. 100,000 only |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| ALL INSURERS |  |  |  |  |
| Financial <br> Year | Number of <br> Claims <br> Settled | Total Claim <br> amount <br> settled* (Rs) | Average <br> Settlement <br> Size (Rs) | Increase in <br> Average Claim <br> Size |
| $2012-13$ | 36,546 | $19,92,39,13,779$ | $5,45,174$ |  |
|  |  |  |  |  |
| $2013-14$ | 38,461 | $23,42,86,08,857$ | $6,09,152$ | $12 \%$ |$|$| * Total amount paid under the claim, since intimation of the claim till settlement |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Source: The Insurance Information Bureau |  |  |  |  |

It is observed that there is a high increase in average death claim size for the FY 2013-14 over the previous year, and the increase in average death claim size for the claims arising out of the policies issued in the years 2014-15 and 2015-16 (which would get settled over the next 8-10 years period) is expected to be much higher

In view of the above, all stakeholders are invited to provide their comments on this draft proposal so as to reach the Authority, also by e-mail addressed to suresh@irda.gov.in, on or before $20^{\text {th }}$ March 2015

Member (Non-Life)
